**Subject:** Blue Moon - solar panels in Harrison County

I am a resident of Harrison County specifically in the area where solar panels would be installed. I have lived in this area for 64 years and it breaks my heart that this good farm land is going to house solar panels for which there is no energy benefit to Harrison County and I would still not want them if there was. The residents in the area that do not want them were not fully informed in the beginning. I understand that some who introduced this program to the farmers have just recently moved into Harrison County. They are not residents who have lived here very long. How would they know what is best for the county? If it just affected the specific farms, that would be one thing, but they will affect the property value for those neighbors around them. These solar panels will be around for years and after their purpose who is responsible for disposal? They will be an eyesore indefinitely. What health problems will be experienced for those in surrounding area? I am a cancer survivor, and I know firsthand that what surrounds you and is on the land affects your health. Please consider stopping the installation of these panels for the residents of Harrison County. Our health may depend on it. Thank you.
