Dear members of the Kentucky Siting Board,

I urge the Kentucky Electric Generation and Transmission Siting Board to approve the Thoroughbred Solar project. This project will ensure financial security for my family as I get older and approach retirement. The long-term, stable, reliable income that we can count in for the life of the project is very important to me.

I understand that solar energy may not be everyone's cup of tea, and they have every right not to choose to have it installed on their land. However, for another to tell me that I can't secure my financial future is not right.

Most people have their 401k, and they want to enjoy the pastoral view of our land. They forget that this land is our retirement plan, and if we can't make it pay, then we may have to sell it, which would be devastating.

My support for the project is for the opportunity it represents to keep the land in the family, keep it producing, and keep our family financially secure.

Respectfully yours,  
Luke Gardner

Respectfully,

I wholeheartedly endorse this project without reservation. It appears as if thorbred is also considering multiuse layers like cross grazing with sheep, and perhaps a joint use bee farm.

Search forward, looking thinking, is not only ecologically sound, it actually increases the agricultural base of Hart County while also adding the solar portion.

If there is anything that I can do to assist, please contact me immediately.

I am writing in support of Thoroughbred's solar installation in Hart County. I am a strong believer in solar as a way to get our country weaned off coal. It is a fairly clean business with little to no polluting of land or air. I respectfully ask you to consider giving them the permit they need to build the installation in my county.

Respectfully,  
Wendy Price
