Subject: 2022-00115 - Thoroughbred Solar, LLC

I'm writing to state my support for this project. The world is changing rapidly, and we're at a turning point. I do believe, with everything in me, that we can find a path in this new economy that will bring prosperity but keep our rural bluegrass culture.

Our little area has struggled with poverty for some time. When I was a child, agriculture was the backbone of the area. That's gone now. We then raised tobacco, we can now raise energy at a much higher profit margin.

I'd love to see this project built, hopefully largely with local labor, providing the jobs that working-class folks in the community need. If we embrace this transition and give the next generation the needed skills to be part of the solution through job training, we'll be moving in the right direction and setting ourselves up for success.

Respectfully,
Patrick Goodman

Re: Case Number: 2022-00115

February 3, 2023

Dear Members of the Kentucky Siting Board,

As a resident of Hart County, I'd like to share my perspective on the efforts made by Thoroughbred Solar to engage and support this community.

From the start, I've been heartened by the level of outreach and involvement of representatives of the project. Groups receiving donations from Thoroughbred Solar include 4-H, the Cattlemen's Association, and the Hart County Fair to name a few. Their efforts have gone above and beyond what a typical developer might do, and I think it shows true interest in engaging and supporting our community.. I expect this to be just the beginning of a strong relationship between the Thoroughbred Solar team and the community, with the project investing in the community beyond the new tax revenue it will generate. They are a true Hart County partner.

This project offers a wonderful opportunity for Hart County to flourish. In conclusion, I respectfully request that the board give its approval to the project.

Sincerely,

Julia Wilson

Respectfully,
