To whom it may concern,
I think 32.12% increase
in our water bill is excessive.
I know you need to make money
in order to operate but 32.12%
increase seems way too much.

I live in a small rural town
and most of our people are like
me, elderly and live on a small
fixed income. Everything seems
to go up except income. Some
have to decide between buying medicine
and food.

Please consider our position.
Thank you very much.
