

To the Public Service Commission, 6-17-22

I am writing in regards to the notice that was received on Friday June 17 2022 informing us of the 32.12% rate increase. I am asking for your intervention in this matter.

Recently Water Service Corp of Ky unveiled a new logo and now, just a couple of months later, we are being informed of a almost $\frac{1}{3}$ per month rate increase to pay for the logo changes on their trucks, uniforms, equipment, promotional materials and of course our monthly bills. We are in a recession. A logo change was not necessary for any reason other than someone wanted a new one. It will have no bearing on our water service or the quality of our water. We are already paying almost \$5.00 a gallon for gas and at this rate we will be paying as much for water.

Please do not allow us to be victimized by a utility company.

Thank You,
Lana Lamb
