PUBLIC SERVICE  
COMMISSION

Dear Linda Bridwell,

I am writing to you once again to ask that you look further into the request by Bluegrass Water about the proposed rate increase, we are being strongly armed by lawyers they have hired to get this thing passed through. They are trying to railroad us, knowing we can't afford a lower and are spending money to get this through, knowing they will profit enough if it goes through to recoup their money, You are our only hope, they are asking for a 700% roughly increase, this is absolutely ludicrous, open an investigation into where the said improvements have been made and where future improvements will be made, this increase will put hardships on many seniors in the area, this is the second time they have tried to push such rate increases through, I haven't seen them anywhere in our area making any improvements. As the area grows so will their bottom line as more customers are subjected to the rate hikes. Thank you for taking the time to read my letter and put yourself in our shoes we deserve answers from them and once again you are our only hope.
