- (c) Our complaint is as follows:
- 1. We are new net-metering customers of KU. When our solar system produces more energy than we use from it, the excess goes back to KU. They pay us \$.0737 per kWh for that energy. They resell that to someone else for \$.09699 per kWh. They make \$.0232 per kWh for every kWh we produced and did not use. In addition, the energy we produced supplements their supply and helps them meet demand. We had more than \$58,000 of infrastructure costs to install this system, yet KU makes \$.0232 per kWh on energy we produce. We have no complaint about paying their Basic Service Charge, because we need their system when our system is not producing energy. But we do not think they should be able to make money on the energy we produced. KU tells us the PSC set the rate they pay us, so I am complaining about that rate. Were our infrastructure costs included in that rate?
- 2. Because KU does not apply all of my credit for their payment to us to a particular bill, we have a carry-over credit. We understand that KU will offset future bills with these credits, when our system may not be producing as much energy. But KU is holding our money and there appears to be no limit on how much they can hold for how long and they do not pay interest on these credits. After 2 1/2 months, they are holding \$73 of our money. We have not been through a winter with this system, so we do not know how much "credit" may accumulate. We are asking that there be some reasonable limit to the amount of the credit and a reasonable time for them to hold our money without refunding it to us.
- 3. The bill itself appears deceptive to us. Our understanding of our new meter is that we use our system's energy first and that the meter does not measure how much of our own energy we are using. The first reading on the meter is the number of kWh KU sends to us. The second number is the number of kWh we send to KU, which is the excess energy we have produced over and above what we have used. The bill subtracts those two numbers and calls it "Total Usage." That is not our total electric usage that month. A KU representative told me they do not know what our total usage is. At least the bill should not be misleading. Remove the term "Total Usage" and do not subtract those two numbers.

Wherefore, complainant asks:

- (1) that KU pay us the same amount per kWh that we pay them.
- (2) that KU be limited to holding no more than \$50 credit for no more than 2 months.
- (3) that KU's bill remove the designation "Total Usage."
