You have not previously corresponded with this sender.

My name is Patricia Ramey. I live at 1105 Sylvia Street, Louisville, KY 40217.

I hope that you will turn down the LG&E proposal to build two new gas turbines. As the commission tasked with operating in the public interest vis-a-vis our public utilities, I hope that you will look at what will benefit Louisville and its environs most for the next few years as well as the next 100 years. Fossil-fuel generated power plants are no longer in the public interest. At this point, Kentucky needs to move from being last in renewable fuel power generation and join our neighboring states (and the rest of the world) in moving to a greater reliance on solar power as part of its energy mix.

What Kentucky needs is to follow the plan brought forward by the "Increase Solar to 4,200MW" Initiative. PPL's own study shows that a 4200MW capacity from solar is viable. This is the plan that makes sense (and ultimately cents and dollars) as it will not contribute to air pollution and will not leave us with a 70+ year ongoing commitment to injecting pollution into the air we breathe, harming generations to come. The recent windstorms causing widespread damage in Jefferson County, the 2022 eastern Kentucky flooding, and the December 2021 tornadoes in western Kentucky -- all are precursors of the intensity and frequency of dangerous weather that climate change portends for Kentucky. The longer we wait, the more these storms will cost generations yet to be born.

Please turn down the LG&E proposal for gas turbines that leaves us linked a climate-harming

technology. Instead, use your position to help secure a livable and sustainable future for all.

Patricia Ramey

Below is the result of your feedback form. It was submitted by [REDACTED] on Thursday, May 4, 2023 at 12:06 PM

Name: Vernon Neal Goetz
Address: 2459 Kremer Lane
City: Villa Hills
State: KY
Zip Code: 41017

Phone number where you can be reached: [REDACTED]

Home phone:

Utility Name: Duke Energy

State the nature of your concern: That Duke is putting their ESG goals ahead of the lowest gas & electric rates for their customers in KY. And that any Duke expenditures on ESG are at the expense of their shareholders and not their KY users. They need to be stopped immediately.

Have you contacted the utility about the problem: No
