This email includes the Burgin area in which I live-the last we want in our community is ugly solar panels. I saw them all through Georgia on a trip to Florida. They would be a total eye sore entering out little community.

I oppose the construction of the 900 acre solar facility in Mercer County as this is not the highest and best use of this tract of land. The property has been identified as a top site within the USA for industrial development and could lead to thousands of jobs for our area. Land use decision making should remain at the local level with our local governing bodies. Please consider the irreversible negative impact, lost economic growth and consequences this decision will have on Mercer County community and its residence.

PSC Case #2022-00402

I as a local land owner vehemently oppose the construction of a 900+ acre solar facility in Mercer County as this is not the highest and best use of this tract of land! This property has been identified as a top site within the USA for industrial development and could lead to thousands of jobs for our area. Land use decision making should remain at the local level with our local governing bodies. Please consider the irreversible negative impact, lost economic growth damage done to soil , water and wildlife, and the many consequences this decision will have on our Mercer County community and residents. This is the Bluegrass State not the blue glass state! NO TO SOLAR "FARMS".

Thank you for your time and consideration in this matter,

Larissa Taylor

I am writing to oppose the construction of a 900 acre solar facility in Mercer County. This property has been identified as a top site in the USA for industrial development. I think it's very concerning that prime farmland all over the country is being destroyed by hazardous solar panels that leave the land unfit for growing crops ever again, not to mention the health risks associated with them. However if my only choice for this land comes down to solar site or industrial site, I would have to choose industrial. The potential for job creation for our community and future generations is much greater as an industrial site, rather than the handful of jobs a solar facility requires after constructed. I'm also extremely concerned about losing the value of my home and my neighbors homes that border this land.

I'm asking you to please consider the lost economic growth and consequences this decision will have on our Mercer County community.
Thank you
Rita Isham

This is to inform you that as a Mercer county resident that I and my family are not in favor of taking prime farm land to be use in the manufacturing of solar energy that will not benefit the people of Mercer County. The creation of the solar farm only benefits the owner of the land that sales it, and the corporation that runs it. In my opinion farm land should only be used other than farm land only when it benefits the county itself. Examples are factories that employ people, or a housing complex that employs builders and houses numerous families.

Thank you
Bobby Riley

Dear PSC Commissioners,

My name is Gary Keller and my address is
101 K. Seight Drive. I oppose the filing of
Kentucky Utilities Company and Louisville Gas and Electric Company to
construct a 120 MWac solar photovoltaic ("PV") electric generating facility on 900
acres located in Mercer County included in PSC filing 2022-00402.

As a Mercer County citizen, I am concerned for the future of our community and
the need for responsible economic growth in our area. This particular tract has
been identified as a top site within the entire USA for industrial development and
could potentially create thousands of jobs for our residents and those in
surrounding counties. This economic impact would be monumental for current
and future generations of our both our local community and entire state.

I feel our local elected officials and governing boards should retain control over
decision making with regards to land use of this property, and other tracts of land
throughout our county.

In making your decision, please consider the consequences and irreversible
impact on the future of the Mercer County community, and the opportunity cost of
lost economic growth.

Sincerely,

Signed By: Gary Keller
