**Subject:** Rate Increase

Before any rate increase, the PSC should look at LG&E's P&L for the area they cover over the past 5 years. If they don't cook the books I suspect you will find that they are doing very well overall. They always ask for more than they expect to get anyway. You don't pay executives that kind of money if you are not making good money. Every company is taking advantage of inflation and overcharging.

**Subject:** Rate Increase

To whom it may concern,

As a resident of Jefferson county in Kentucky, I want to express my concerns about the upcoming request for a rate increase for LG & E customers. In the last five years we've had 2 huge rate increases, and with inflation being the way it is, to request another one, is absolutely inappropriate at this time. With the historically high heat index this year thus requiring air conditioning continuously, and the cost of living increasing more than ever before I feel it is unethical for LG&E to request another rate hike in the middle of all this, especially when the CEO is making multiple millions a year on his salary. Even physicians who are literally saving lives every day don't make this kind of compensation. I am well aware of the compensation that the higher-ups are receiving in this company, and it is appalling to see, knowing what the economy is doing to customers that are being served by this company. Let me just add, with all the power outages experienced by the community., this is all the more unacceptable. I completely oppose this most recent request for a rate hike for customers in Jefferson county, and anywhere else that LG&E serves. The CEO should consider making adjustments to his multi million dollar salary instead of asking struggling customers to compensate again.

Signed , a fed up and tired customer...  
Sonia Itticheria

Americans do not need any more price hikes. Their wages have not increased enough to keep up with inflation. A 17 year old child died because he wanted to escape the heat in their home and thought he could sit in the car with the air conditioning on. He was in a garage. How much more money does LG&E need? NO MORE PRICE HIKES, PLEASE!!!

You have not previously corresponded with this sender.

As a long time resident of Louisville I am appalled by the ridiculous & callous nature of the civic boards and commissions that in the past three decades have brutally increased the costs of our utilities. Far beyond inflation, these price hikes have failed to improve service in any meaningful way. Please raise a voice in the wilderness and vote NO to ANY rate increase! Thank you!

I'm a widow with two kids in college. We can't keep getting rate hikes all the time. There has to be accountability on their part. If you allow another one, everyone is going to assume there is corruption in the lack of advocacy on behalf of customers. Tell them no this time, for the love of God.

[Report Suspicious](#)

Hi -- could you send me a link or info on the proposed LG&E rate hike?

I am still very unhappy with LG&E and the "rolling black out" that occurred in December 2022 during -30 degree temperatures. My 90 year old mother in Briarwood had to be quickly evacuated. I was never able to figure out how to file a complaint with LG&E. The blackout was totally uncalled for and was not advertised very well.

LG&E public communications and community relationships are horrible. I wish we had another choice. Monopoly is always bad.

Thank you.

Kevin Miles
