Subject: Public Comment in PSC Case #2022-00402

Dear Public Service Commission,

I support the comment submitted by Kentuckians for Energy Democracy. I strongly support the closing of aging coal plants in Kentucky and efforts to develop more solar power and energy efficiency. Replacing coal with gas plants is no improvement. Not only would this be costly, it would continue to make us dependent on fossil fuels and its polluting emissions. The climate extremes we are now experiencing are witness to the urgency of our need to convert to renewable sources.

There is a groundswell of interest in rooftop solar and other renewable sources.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Sincerely,
Joan Perkins

LGE/KU Case, 2022-00402

While I support the closing of the coal plants and addition to solar, I am concerned with emissions from the proposed Natural Gas Plants. You need more extensive hearings and guidance that even if we go ahead with the Natural Gas Plants that their negative environmental effects are minimized.

It is in the best interest of KY and the nation to close the plants associated with this case. It is also in our best interests to NOT build the two new natural gas plants but to replace that capacity with renewable energies.

KY needs to move to a leadership role in renewable energy. We need to leave our old polluting plants behind and become a shining example of energy production.

Thank you,
Greg Shade
