

To whom it may concern,

I am writing this letter to you concerning the Bluegrass Water proposed rate increase of 694.9% increase, this is the second time in as many years they have wanted to do this, with the same reasons as last time, I am retired and on a fixed income and find this amount of an increase ridiculous, inflation is wild, stock markets are down, and times are tough, it says they have invested 16 million but I have yet to see them even in my area, so where are these said improvements, I believe there should be an audit to investigate the real reason for such a rate hike, I hope you can understand my concerns, and not allow such an increase to happen!

Thanks for your time,

Jesse Brown
