

Dear Sirs,

March 3, 2023

I am writing in hopes that our Waste water treatment company Bluegrass Water Utility Operating Company LLC will be denied the proposed increase in rates. This would be the second large increase since they voluntarily purchased and began running our plant. I do not feel that our rates should be increased to cover what should have been known issues that they are calling upgrades and repairs.

I am a homeowner in the City of River Bluff Oldham County, KY and I must endure the foul smell that emanates from the plant as well as the incessant noise it generates while processing. However, I have not requested a decrease in the rates that are charged.

Sincerely,

Eric Isbell
