Subject: Rate increase for Sewer

To Whom it may Concern:

We are longtime residents of Longview Estates in Scott Co., Kentucky. There are two of us residing in a single family home. Recently, we received another letter from Bluegrass Water UOC informing us of yet another proposed rate increase for sewer service. In recent months our rates have increased approximately 300% and they are asking for 15% more. To us it is time for the PSC to step in and investigate why another rate increase is needed. To my knowledge BG Water has spent very little to update our sewage treatment facility as it is in a state of good repair.

Please protect the citizens from this unnecessary over pricing of one of our essential utilities,

Thanks,

Barney & Kim Booher
