Dear Kentucky Public Service Commission,

Member-owners of Big Rivers need warm homes, affordable energy, clean air, and a safe climate. We shouldn't keep investing in things when they no longer are effective or affordable. Instead, Big Rivers could be planning to invest that extra money into programs that help us have warmer homes, lower electric bills, and a safer climate, such as:

Energy efficiency programs to make our homes more comfortable, cheaper, and efficient
Rooftop solar
Virtual power plants
Battery storage that keeps the lights on
Payment options like Pay as you Save that make these programs accessible to those who need them most.

The most needed families are the ones that are the most affected. Please, consider the consequences to our future.

Sincerely,
Manuel Matos

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Sincerely,
Mr. Manuel Matos
