[REDACTED]

Dear Commissioners

Case #2023-00092 KY Power Integrated Resource Plan Case

So as not to place an unfair burden on low-income customers, I urge you to consider that utility companies in Kentucky invest in clean, renewable energy sources such as wind, solar, and battery storage. These investments not only help customers, but keep the utility more resilient and reliable when it comes to providing energy.

We cannot allow our utility companies to keep investing in risky gas plants. To do so would mean that customers would pay the expenses of not only these plants but also any fees due to carbon regulation. Clearly gas is not a safe, clean nor affordable investment.

Sincerely,
J. Venneman
