Dear Commissioners

Case #2023-00092 KY Power Integrated Resource Plan Case
Kentucky power is A Corporate energy pirate, pillaging & plundering All the money from the working middle class&Lower income folks of Eastern Kentucky.They are planning their Next 15 year wish list while meanwhile many lower income don't know where ends meet for the next 15 days&the PSC Seems to be a Rubber Stamp for Kentucky power over that Recent Years.WHO!! WHO?? Is guarding the sheep while the Supposed shepherds in charge of protecting said sheep are entertaining the desires of the Wolves&Coyotes.Yes it's an Analogy of Ky power,The PSC&The Eastern Ky power customers,But this is exactly whats been happening for the past 30 years&The so called Protectors of the public have been hob knobbing & Sympathetic to the Greedy Energy pirate predator &Not the Energy consumer they are Supposed to be protecting ! And this is Very Obvious to the people of our Region.

Sincerely,
Glen&Ruth Jenkins

Subject: Public Comment in Case #2023-00092

Dear Commissioners

Case #2023-00092 KY Power Integrated Resource Plan Case

KPC's current and proposed programs fail to meet the biggest needs of our communities: energy efficiency and local resiliency.

Energy Efficiency helps us stop wasting electricity and money in our homes and businesses, and lowers utility power costs 24/7 - especially when more people are using power and it's most expensive.

KPC can invest in us to make our homes energy efficient: They can offer "inclusive financing" which pays the upfront costs of efficiency upgrades like new water heaters and insulation that are in turn paid for by a monthly charge that is less than the monthly energy savings. This would lower our bills and make our homes more safe and livable!

WE NEED TO BE ABLE TO AFFORD TO BUY OUR OWN SOLAR AND BATTERIES

We applaud Kentucky Power for investing in renewable energy, including their distributed solar gardens program. But Kentucky Power's IRP fails to help most of their customers access much-needed solar and batteries. One of the easiest ways to make rooftop solar more possible for our

homes is using a payment system called net metering. Net Metering allows customers to reduce their energy bills with rooftop solar and is a win for utilities and for customers by reducing how much energy we need from the utility when energy is most expensive. With Net Metering, energy we produce right at our homes can continue to grow at a significant rate that will meaningfully lower the costs for KPC to meet the energy needs of their customers. Kentucky Power recognizes that they are essential to making our energy system affordable, reliable and resilient. Kentucky Power could take steps to promote net metered solar such as:

KY Power should plan to extend net metering. The companies are free to continue net metering even after they meet the requirement to offer it up to a 1% threshold. And it is in their interest and our interest to do so.

They should raise the cap on the size of net metered systems. This would particularly support small businesses.

They should support net metering on multifamily housing.

They should provide payment options, including on-bill financing, for homes that install solar

They should work with partners on workforce development

Sincerely,
Kyrie Fowkes
