Dear Kentucky Public Service Commission,

Kentucky Power customers are already paying the highest power bills in the state. We need warm homes, affordable energy, clean air, and a safe climate - NOT HIGHER BILLS. Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Sincerely,
Ms. karen gulley

Dear Kentucky Public Service Commission,

Good afternoon,
Hope you are doing well. Wanted to let you know that I am very concerned about the proposed rate hike.

Kentucky Power customers are already paying the highest power bills in the state. We need warm homes, affordable energy, clean air, and a safe climate - NOT HIGHER BILLS. Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs.
We have no choice of who provides electric in our area....

Several of our neighbors are barely making ends meet now. This will make it extremely harder on everyone. The CEO was paid over \$16 million by AEP last year. Seems like parts of the movie "The Hunger Games" is starting to become a reality. The rich get richer and the poor get poorer...

Thank you for taking the time to read my message. I thank you in advance for your consideration and hoping that you reject the proposal to raise the residential rate. Please do not raise it at all.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory

process.

Sincerely,
Mrs. Teresa Plank

I'm already having to help my daughter and grandchildren pay their electric bill. I know of families that hardly keep food on the table and they struggle with unreliable cars and sick children and the last thing they need is to have to pay more for electricity. COAL kept the LIGHTS ON!!!! Kentucky Power sold out and really don't give a damn if we're in the dark or COLD!!!!

I live on disability I can't even buy groceries to do the whole month. If they raise it even higher than already is I will literally have to go without food. It's ridiculous the money they make and always asking for more. There are already people going without food and freezing in winter because we can't turn heat up knowing it will run over 300.00 s moth

Dear Kentucky Public Service Commission,

I would like to address the issue of electricity being raised, most Kentuckians are already behind, folks on fixed incomes can't afford a rate hike it's hard enough to put food on the table and gas in the car to be able to make the payments as it now is, We need help paying our bill now what will happen to the old and the babies if left to face the winter months without heat, please rethink and revise your plan to raise rates in Kentucky

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

How much more are people supposed to shell out? Inflation is at an all time high, bills are through the roof there are people that cannot afford food, medicines, everyday things that some people take for granted. It's a shame that you're supposed to decide whether you have to stay warm, buy food, or buy medicines. Of course I'm sure the politicians out in Frankfort and the public Utilities Commission aren't concerned whether you freeze or starve and if there making that much profit and able to pay CEO that much then they aren't hurting for money it's making it hard on the consumer and nothing else. It's all for the money not to help the people

To: PSC Public Comment <PSC.Comment@ky.gov>
Subject: Kentucky Power Rate Hike

Dear PSC Representatives,

Please do not allow Kentucky Power to increase residential rates by 18%. We are already paying the highest electricity rates in Kentucky. Years ago, Kentucky Power had some of the lowest rates in the nation. Decisions made by the AEP Corporate Office to not keep contracts to receive lower cost power from the Kammer/Mitchell plants in Ohio & the Rockport plant in Indiana have hurt our Eastern Kentucky families. We should not have to pay for their mismanagement of environmental controls, decommissioning of units, switching from coal to gas, and storm damages. These expenses should have been part of their long-term planning and not be put solely on the backs of customers. They continue to have millions in annual income and can afford to pay their corporate officers, board members & shareholders great salaries & dividends. The fact that the sale of Kentucky Power to Liberty was denied by the PSC should also raise a red flag.

Our citizens in Eastern Kentucky deserve reasonably-priced electricity that is generated locally, and not purchased at the highest dollar on the open market when AEP refuses to keep generating capacity & contracts for lower priced power.

Please do everything in your power to keep our energy costs from increasing any more. Thanks for your consideration.

Dear Kentucky Public Service Commission,

Kentucky Power customers are already paying the highest power bills in the state. We need warm homes, affordable energy, clean air, and a safe climate - NOT HIGHER BILLS. Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs. I am fed up I already pay enough for my bills by the time I pay my bills and pay for my families medicine I barely have enough to get food and then you want to increase my power bill how are we supposed to live. The rich gets richer and the poor people get poorer I hope you can live with the decision when you vote for this 18% raise on electric. Thanks Tekesha Phillips

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Sincerely,
Tekesha Phillips

Dear Kentucky Public Service Commission,

Ever since AEP took over KEP they have asked for more, more,more, more&it seems the Kentucky PCS for the most part is Usually All to Happy to oblige, We personally believe the Kentucky PSC is Bought&paid for by the AEP/KEP Lobbyist in Frankfort like so many other present&past Kentucky State Senators &State Representatives and politicians.But Everyday Kentucky citizens do not have the kind of money these White collar criminals are Constantly Trolling for,I used to drive a Fed Ex Van before becoming Disabled,I've seen&still see the Huge Houses,Boats, Fine Cars&trucks,RV's,Off road Vehicles they have on their acres of properties&farms !! Where does all that money come from ?? One guess ! The poor&middle class who have to pay out half of what they make a month to AEP/KEP so they can live this way. Everytime a large Community event,Regatta, etc is held in our area, Guess who is the Largest or top 3 largest Sponsor...KEP or AEP !! Where does that money come from ?? The poor&middle class their gouging every month, Everytime the need more money or spend to frivelously , No problem...we'll just get the good ole PSC to Rubber Stamp us a new rate increase.We Already have to get Constant financial assistance from Northeast Community Action to help us pay our Electric bills as My Wife&I are Disabled & raising Grandchildren, But KEP&the PSC couldn't care less ! They can't see poverty from their lofty perches.We consider them "White Collar Criminals& Extortionist. We have No Voice in Frankfort in Boyd,Carter,Greenup, Elliott, Lawrence County's,Our State politicians are in the same Dirty bed as AEP/KEP/PSC

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory

process.

Dear Kentucky Public Service Commission,

I'm a 62 yr. old widow (recently diagnosed with cancer), living on SS Disability, and I cannot afford an increase. I barely get by now, while leaving my heat on about 67 all the time. I'm cold now!! What will I do if the bill goes even higher? I've paid \$400-\$500 a month through the winter, which leaves me little to pay my other bills, eat, and live on. Stop this insanity.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

I , and many people that I know are barely surviving as it is. Families that I know are doing everything they can just to make ends meet. A new hike in electricity will mean that a whole lot of people are going to have to let some essentials go, either medicine, food, heat, etc. Enough is enough.!!! How can a billion dollar company get by with shafting people over and over again? It has to end at some point. Maybe the CEO can think about donating some of his millions to pay for funerals for some folks who may not survive this increase!! Kentucky residents have had it!!!

Dear Kentucky Public Service Commission,

I personally CAN NOT afford to pay any higher than I already do to heat and light my home. All these companies always want to raise the rates. The problem is we don't get a wage increase to keep up with all these rate increases. The Public Commission should look out for the people not these companies. WE CAN NOT AFFORD HIGHER UTILITY BILLS!!! PLEASE DO NOT APPROVE A RATE INCREASE!

Kentucky Power customers are already paying the highest power bills in the state. We need warm homes, affordable energy, clean air, and a safe climate - NOT HIGHER BILLS. Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs.

Subject: Public comment on PSC case #2023-00159

Dear Kentucky Public Service Commission,

As a customer of Kentucky Power we are already paying outrageous amounts for a basic necessity. We do not have a choice but to pay or allow our families to be left in the dark and cold. I am a mother to four and am already struggling to keep my head above water and provide their basic needs. I work as much as possible but with inflation hitting at every stop it is difficult for a regular family to survive. If Kentucky Power is approved for the 18% hike how are regular working class families or those on a fixed income suppose to survive? It will mean more of choosing between electricity or buying groceries or medication such as diabetic/cancer.

Why should the customers that have no other option be forced to continue to pay for the employees to get paid an ridiculous amount? Why hasn't Kentucky Power been investigated to see where all the money they are making from their customers is actually going?

Enough is enough! No wonder so many are moving for certain areas, that truly need these residents to stay afloat, because they realize Kentucky Power will break them! Please think of the every day citizens and not the big corporation!

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Sincerely,
Patricia Stallard

914 Craft Colly Rd Ermine, KY 41815-9009

Dear Kentucky Public Service Commission,

I work two jobs, live in a single wide trailer and am only home about 5 hours a day. My electric bill is ridiculous. When I first established service in 1995, my bill was no more than \$150 in the winter and I stayed warm. Now my bill is not that in the summer! I understand inflation, but electric rates are not like this in other places. All that is happened if is we are driving people away. Please stop this ridiculousness!

Kentucky Power customers are already paying the highest power bills in the state. We need warm homes, affordable energy, clean air, and a safe climate - NOT HIGHER BILLS. I am a Senior Citizen with Social Security as my only income. Electricity is my only option for my home. I live alone and have no other help paying my bills. If I was not on the budget plan, there is no way I could pay my bill in the winter time. With the high cost of food, clothing and everything else, I cannot stand another 18% additional cost on my already tight budget. I hope and pray as responsible officers for the PSC, you will do what is right for Eastern Kentucky residents and reject this rate increase. Thank you for your time and attention to this pressing matter.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

My husband and I are on Social Security and our house is all electric. We have already cancelled our satellite tv, decreased all our bills in all the ways we can, and still are having a hard time making it. We can't afford to take any vacations anymore. Haven't been anywhere in 4 years. Groceries keep going higher. Our medicines are outrageous! We need help, not more payment increases. Please don't do this. You all have plenty of money. Try livi g on 3,000 a month for two people.

Dear Kentucky Public Service Commission,

Listen, myself and many others that I know can barely afford our power bills as it is. We have to scrimp and save to make sure our houses are warm and safe. My HVAC has died and the last two years we've been using portable heaters to heat our home until we can afford to get a new HVAC system installed. It's already outrageous using the portable heaters. I can't imagine the bills this winter if there is a hike. Eastern Kentucky cannot afford a price hike. Have some heart, Kentucky Power!

Kentucky Power customers are already paying the highest power bills in the state. We need warm homes, affordable energy, clean air, and a safe climate - NOT HIGHER BILLS. Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs.

Dear Kentucky Public Service Commission,

Kentucky Power customers are already paying the highest power bills in the state. We need warm homes, affordable energy, clean air, and a safe climate - NOT HIGHER BILLS. Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs.

I currently pay 350\$ per month on budget I truly cannot afford to continue the increase. We have turned down the thermostat in the winter and actually freeze to attempt to save electricity. Please stop the increase again. Let us pay a reasonable rate compared to other places in the US. Thank you for your time Melissa Parks

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Sincerely,
Melissa Parks

Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs.

The current and proposed rates siphon money from the regular upkeep of my home. They interfere with my improving my property. They make it hard to attract new homeowners to the area. It is in Kentucky Power's interest to grow our communities rather than inhibit them. Higher bills detract from the livability of our area.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

I am on a fixed income and leave my heat turned down and can't afford to be comfortable in my home because of the price of power
I live in eastern ky and will tell you if I could move to a place that had better rates I would
These rates make it very hard for small businesses to survive
While the big ones get all the breaks it is a shame the place I love is ridiculous to live anymore
Thank you

Kentucky should have used money to keep infrastructure up to date. I'm on a fixed income so this will greatly affect me. People making minimum wage will be hard hit with this raise. Salaries or income doesn't get a raise to pay for stuff they were supposed to keep up, big business needs to be better managed.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Dear Kentucky Public Service Commission,

Kentucky Power customers are already paying the highest power bills in the state. We need warm homes, affordable energy, clean air, and a safe climate - NOT HIGHER BILLS. Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs. Please don't raise our electricity. We are all struggling. It is so hard on us. Help us out

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Sincerely,
Kathey Chapman

Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs.

This rate increase will especially hurt the elderly and others on a fixed income. If Kentucky Power is making a profit then don't promote their greed with a rate increase ,if they aren't showing a profit recommend they perform an efficacy audit and find cost cutting measures before taking from those who can least afford it.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Dear Commissioners

Case #2023-00159 KY Power Rate Case

Kentucky Power is claiming that increased rates are needed due to having fewer customers and the need to build their own power generation (they currently buy a lot of power from the regional grid instead of producing it themselves). Instead of raising rates, KPC could invest in energy efficiency programs that both lower our bills and decrease the need for expensive new power plants. We shouldn't have to pay for their bad decisions.

Sincerely,
Stephen Dutschke

Dear Kentucky Public Service Commission,

Please have mercy on the people of Eastern Kentucky. We have been through hell with the flood of 2022 - many people are still trying to rebuild and others have given up and moved away. Our power bill at home has already doubled. We work but paying bills is not easy. I can't imagine how much another rate increase would hurt people on fixed incomes. Please don't allow this to happen.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Dear Kentucky Public Service Commission,

Over the last few years the power company here in pikeville aep has been fined for overcharging costumers if they are allowed to always raise the bill more than they have to pay in fines why would they stop . We want no we need to stop aep or KY powers monopoly on our power and open our markets to competition it would lower prices and force better efficiency .Kentucky Power customers are already paying the highest power bills in the state. We need warm homes, affordable energy, clean air, and a safe climate - NOT HIGHER BILLS. I'm an elderly woman on a fixed income and I can't afford electricity as it is. My bills go anywhere from \$400-\$600 in the winter and around \$250-\$350 in summer. It's hard to live on a fixed income, but medicines and have food in the house to sustain. Add on top of that insurance on a car or car payments just to have a reliable way to the doctors and stores for basic needs. Makes paying more for electricity even more unaffordable. Please don't pass and increase on our bills. The elderly on a fixed income just can't afford any more hardships.

Subject: Public comment on PSC case #2023-00159

Dear Kentucky Public Service Commission,

Kentucky Power customers are already paying the highest power bills in the state. We need warm homes, affordable energy, clean air, and a safe climate - NOT HIGHER BILLS. Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs.

Maybe use some of the record profits for share holders or the bonus the CFO or CEO is getting along with his raise to make up the difference? Just a thought. Your customers are tired of being fleeced by inflation claims when the ACTUAL inflation is from the top.... Yes, shareholders should make a REASONABLE profit but not at the cost of your customers.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Sincerely,
Mr. Holton Eads
812 23rd St Ashland, KY 41101-2834

Dear Kentucky Public Service Commission,

Hello, I'm a 75 year old widow on social security living in a mobile home. I'm hear to tell you that making ends meet these days is very hard financially. You look at price of groceries, gas for my car, doctor bills, insurance and now KY Power wants to raise the cost of me trying to stay warm this winter and I say NO!!!! KY Power needs to learn how to make good sound investments and not bankrupting their customers. Kentucky Power customers are already paying the highest power bills in the state. We need warm homes, affordable energy, clean air, and a safe climate - NOT HIGHER BILLS. Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Dear Kentucky Public Service Commission,

As a single mom of 6 i will just have to go without heat or qir if they raise the bills any higher. Rent and everything else has already went ul to the point people cant afford to live. 18 percent isnt a small increase as its the rate before taxes higher rate means more taxes and for a 4bedroom thats gonna cost me an extra 75 to 100 m9nth. Thats ridiculous! Kentucky Power customers are already paying the highest power bills in the state. We need warm homes, affordable energy, clean air, and a safe climate - NOT HIGHER BILLS. Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs.

Ky Power messed up, they should have put scrubbers on their power plant decades ago. Fore they had to tear it down. Bad management. We shouldn't have to keep paying over and over, they just had a rate increase ! Let them lay off workers and contract that work out

Dear Kentucky Public Service Commission,

Kentucky Power customers are already paying the highest power bills in the state. We need warm homes, affordable energy, clean air, and a safe climate - NOT HIGHER BILLS. Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs. PEOPLE IN THIS CAN NOT AFFORD TO PAY FOR KY POWER/AEP'S BAD MANAGEMENT. WE ARE ALREADY BUYING THE FUEL TO RUN THEIR POWER PLANTS, TO HAVE OUR METERS READ BY SOMEONE DRIVING BY IN A VEHICLE AND STILL PAYING FOR POWER PLANTS THEY DECIDED TO NO LONGER USE AND TORE DOWN. THESE CHARGES ARE BASED ON A PERCENTAGE OF WHAT TH3 AMOUNT OF COST FOR KILOWATT HOURS WE USE. EXAMPLE,...for a billing rate of \$600.plus dollars, they add those mentioned charges and the bill for one month ends up being \$804.00!!!! For a 3 bedroom home. I retired in 2017 at the age of 64. I consider myself lucky because I not only have social security but I also draw some retirement funds that I worked 40 years to get, but instead of enjoying my last years, I am being robbed by some greedy company. The other thing I want to mention is, they say they have lost revenue due to

the flood. Well I don't see it that way. They had to replace some electric lines that probably already needed to be replaced. Truth is, if wind blows the power goes out and may be off a few hours or may be three days. As for the power poles, and outside meter boxes that go on the pole, plus a service charge by the power company to hook the power up.....the customer has to pay for that. The power company as far as I can see is making a profit,

since those items have to be purchased from them, and they get paid a service fee, plus a deposit based on what your power bill was in the past. They don't even set the poles, the customer has to pay someone else to do that!!!! They consider it a loss of revenue for a year. They need to stop and think, just how much money they were charging those customers in the past and appreciate them as they are finally just now getting back in their homes. Those people lost EVERYTHING!!!! HOMES CARS, PERSONAL BELONGINGS AND SOME EVEN LOST FAMILY MEMBERS. So some revenue is minor compared to what they have been through, so to ask them or the older residents in this area to pay for their poor management is a damn shame. I am 70 years old and should be enjoying my retirement but instead, I had to go back to work. Some people, as I mentioned before are not so lucky. Some only have a small income and are not healthy enough to do what I am doing.... working till I die just to have heat and air. It is, to say the least, frustrating and unfair!!!!

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Sincerely,

Dear Kentucky Public Service Commission,

I just had a new heat pump install, insulation placed in attic and crawl space. It has saved one hundred and eighty dollars on last month's bill. Now they want to raise 18% and get what I've saved back every month. We can't take any price hikes. Zip, zero, no amount. After my social security pays my utilities, life insurance on my wife and I, car insurance on 2 cars and groceries and medications my budget has 36.00 dollars a month. \$1,900 a month won't pay everyday expenses as it is.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Dear Kentucky Public Service Commission,

Kentucky Power customers are already paying the highest power bills in the state. It's ridiculous! We need warm homes, affordable energy, clean air, and a safe climate - NOT HIGHER BILLS! Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs. The way Kentucky power has been for my family is horrible! We had to go without power just so we could get food the power bill was so high! and all the others but the power bill was the highest and always is! If the bills continue to go higher I fear this will happen much more often and it's not going to be good. I see myself and my family freezing in the winter and suffering from heatstroke in the summer. I assume the same would happen to others in my community and I don't want that for anyone. What Kentucky power could do to address the high bills is lower them for one thing! They're the only power company we can get where I'm at. I think they're the only ones we can get in the whole state. Everyone is forced to pay these sky high prices because it's that or let themselves and their families freeze and/or get too hot and both of those can be deadly! Not to mention just uncomfortable. Especially for young ones and the elderly as well as any pets they may have. Please listen to our pleas and LOWER THE BILLS! We shouldn't have to choose between food and power!

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Sincerely,
Ms Cayley M

[REDACTED]

Dear Kentucky Public Service Commission,

Kentucky Power customers like me a single dad raising 3 kids are already paying the highest power bills in the state. We need warm homes, affordable energy, clean air, and a safe climate - NOT HIGHER BILLS. Some months it comes down to the choice between paying my electric bill or put food on the table because my electric bill is so high. The electric shouldn't be so high when Big Sandy Recc a mile down the road is \$150.00 or more cheaper for the same electric. Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Sincerely,
Toby McKenzie

Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs.

There is no way that I, as well as many others on a fixed income, can continue to pay higher electric bills. We have to make the decision between electricity and things like food or medicine.

AEP/KY Power is a business, and I understand that businesses want to make money... but for many years they paid big dividends to their investors and gigantic bonuses to their executives. As I said, I know they are a business but as a business, they should have been using a lot of their profits to go towards upkeep.....they didn't do this. They let the right of ways for the power lines get out of control, so when storms came, they were damaged. Their investors and administrators reaped rewards that should have gone towards upkeep.....that is not the consumers fault, it was theirs. Why should we have to pay for their greediness.....truth is, we shouldn't have to.

I have family that live in much colder areas of the country....Michigan, northern Ohio, Minnesota, North Dakota...they have larger houses than I do, yet their electric bill is lower than mine!

We live in an area that is already impoverished....another rate hike will make it even

worse. I just don't see why we have to pay higher bills because of their poor business practices. They need to accept responsibility and use hindsight to revise their practices to make sure they have a contingency plan instead of paying big bonuses to executives..

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

The excuses for this massive tax scheme on eastern Kentuckians are laughable. You're going to lose more revenue than you dream of gaining, as a result of low-income customers being unable to pay you every month. That includes me. We have it hard enough and I ask you to scrap this proposal.

[REDACTED]

Dear Kentucky Public Service Commission,

Kentucky Power customers are already paying the highest power bills in the state. We need warm homes, affordable energy, clean air, and a safe climate - NOT HIGHER BILLS. Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Sincerely,
Charlie Angell

Subject: PSC Rate Hike VOTE NO!!!

PSC,

I have no doubt that you tell people to send you comments that won't even be read. I dare you to reply and not just an automated response. People are hurting and struggling right now with the inflation that's coming out of DC. The extra money that AEP needs to be used by the Kentucky residents that you represent. It's not our fault that your commission decided to take the Big Sandy plant away from coal powered (locally mined and the lowest priced delivered to the plant throughout the AEP Power system). This was in my opinion the worse decision ever made, we were blessed with the lowest power rate in the US. I would like to ask if you're retired or if you're in need of state or federal assistance? If you were and I doubt you are you couldn't afford another rate hike. I ask that when it's your turn to vote for or against this request you will say HECK NO!!! I'm not against big business but I am at the expense of those who can't afford it. The CEO of AEP making over \$16,000,000.00 a year. This is equal to \$1,300,000.00 per month or \$325,000.00 per week or \$65,000.00 per day or over \$8,000.00 per hour sign me up for that gig. I sure hope he clocks out to go use the bathroom or to get a cup of coffee. I can only pray that MY PSC looks AEP in the eye and tells them if you need more funds for your company then you should find corners to cut. The first place I'd start is right at the top, I'd make the top salary \$1,000,000.00 and I'm sure that would cut more than just the presidents salary. Remember, you work for us and not AEP or Mr Akins/CEO.

Thank you,

Chris Bruner
Catlettsburg, KY

Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs. I'm on a fixed income and I can't spend more than I receive monthly and Ky power shouldn't be able to raise rates so that they can continue to overspend ! They need to lower rates for all of East Kentucky and figure out why they are losing customers and fix these issues, lowering the rates might just bring customers back to eastern Ky!

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

I am a single retired senior citizen on a fixed income. I can't afford any more increases. I already pay almost more in car insurance a year than the value of my car. Health insurance raises every year based on your age. Food and gas prices are out of this world. Let the CEO and other top executives take a cut in their salaries. They need to live like the rest of the lower and middle class population.

Dear Kentucky Public Service Commission,

Kentucky Power customers are already paying the highest power bills in the state. We need warm homes, affordable energy, clean air, and a safe climate - NOT HIGHER BILLS. Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Sincerely,
Mr. Fred Tussey

My family is already struggling to pay bills because of inflation. There should not be an increase in utilities when the whole community is struggling to pay the current rate which is also too high. There should be an effort to find a way to lower these rates. You are making families like mine choose between electricity and food and it's unacceptable.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs.

Our bill is already in excess of \$500.00 most months. When I called to complain I was told to build or buy a more efficient home.

I have a decent job but, I still find myself basically living from paycheck to paycheck. It's a shame that I work so hard to be this broke.

Please reject the rate hike and force the company to gain profit by "trimming the fat" including dropping the wages from upper management.

Like I said before, I make a decent wage but another of people near me are living on a fixed income. Some are trying to survive on \$800.00 a month and already paying \$400.00 a month Power bill. How are we supposed to survive like this????

Thank You,
Douglas Francis

Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs. I already had a power bill of \$700.00 this past August! I am a widow with two children in middle school and barely meet my obligations as is...my family cannot sustain another rate hike! Eastern Kentuckians are struggling under increasing costs of living. Our pay rate does not allow us to make ends meet beyond our obligations, if that! Why do the economically challenged residents suffer the most?

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Sincerely,

Dear Kentucky Public Service Commission,

Kentucky Power customers are already paying the highest power bills in the state. We need warm homes, affordable energy, clean air, and a safe climate - NOT HIGHER BILLS. Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs.

Our bills in SEY are some of the highest in the nation. It is ridiculous what the shareholder of KY Power-AEP is making in profits when people here are struggling to keep lights on. For example my home where my power just a couple of years ago was \$250-\$350 a month. Now is \$350-\$525 a month. Nothing has changed in the size or use in that time that should make it that high. In fact, I have a new washer and dryer that are energy efficient, and two new heat pumps that are supposed to be more energy efficient. And your commission vetoed the buyout of AEP by liberty who was going to cut our bills and as soon as AEP had control of it again they're trying to raise the rates again. Put an auditor in place in their company and make them be more fiscally responsible. We should NOT have to pay for their mismanagement of the company.

There are so many stories that I could put on here but one example is several years ago during a storm that knocked out power. I know someone who had no power in their house for 3+ weeks and used fireplace for what heat they had. Their power bill was 1.5 times higher than the month before when they had electricity. I don't know if they ever got that straightened out. But there are always stories like this every winter and it's so disheartening

and such a deterrent to progress in this area. NO RATE HIKE should be agreed upon. And if you approve one then shame on you. You're supposed to be the public service commission not the AEP service commission.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Sincerely,
Sandra Morris

Dear Kentucky Public Service Commission,

Kentucky Power customers are already paying the highest power bills in the state. We need warm homes, affordable energy, clean air, and a safe climate - NOT HIGHER BILLS. Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs. Both my husband and I work hard to earn a livable wage. We both work long hours to do so. Why do we already have the highest bills in the entire state? Our little area has such a ridiculously high poverty rate in comparison to the rest of the state. How is raising our bills helping this area? How is it justifiable at all? Folks in our area are choosing between food and medicine and clothes and this company believes we should pay more for utilities that we are already paying more for than anybody else in the state. Many folks in our area have barely survived flood natural disaster and the community as a whole can not withstand another increase. I hope that someone actually listens and doesn't do further damage to an already deprived and poor region. Our people deserve so much better.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

I work at a job making fairly good money for this area. But honestly, I dread seeing my electric bill this winter, just like every other winter. My thermostat never gets set above 68°, and that is only for very short periods of time. Working people cannot qualify for any type of assistance. With the prices of absolutely everything else raising so much, I am sure there will be a very large number of working people having to choose between their electric bills and groceries. It is almost to that point now, and winter has not even started. We are already being vastly overcharged. Another rate increase cannot be justified.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Dear Kentucky Public Service Commission,

Kentucky Power customers are already paying the highest power bills in the state. We need warm homes, affordable energy, clean air, and a safe climate - NOT HIGHER BILLS. Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Sincerely,
David Mckenzie

Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs. My husband and I both work and make decent money and we have a small home yet we can barely make ends meet as it is. We have had to have help from government programs and our families to make sure our electric bill is paid because AEP has no mercy even during the cold winter months and will shut your power off no matter what. We have had to ask for extensions multiple times and our bill is usually late because we are trying to get the money to pay the bill without emptying our bank so we can still afford food and gas! Its ridiculous and we cannot afford another hike and I am sure we are not the only ones!!!!

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Sincerely,
Mrs. Danielle Davis

Dear Kentucky Public Service Commission,

We are a low income household of 5 we can NOT afford a rate hike! We are really really struggling just to keep food on the table.. I am always juggling bills letting them double up so I can feed our family.. This would be another nail in our coffin! Please don't allow this rate hike.. children like mine are already going to bed hungry this will make it worse.. I am begging you as a parent to think about how this will effect those less fortunate than KY Power . Food prices are astronomical and are not coming down it takes everything we have and and everything we beg and borrow to keep our family afloat please protect us!!

Sincerely
Gwen Slone
The Slone Family

I can't afford more a month. This is ridiculous. I'm barely making it monthly with high power bills now. Ways 300 a month and in the winter can go to over 500 a month. Should not have to pay for their mismanagement on operations and their money.

Eastern Kentucky is one of the highest regions for power bills. It also is one of the poorest economically. Other utilities around the state are not as high as Kentucky Power. Enough is enough.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Dear Kentucky Public Service Commission,

As a long time Kentuckian we have consistently struggled with power bills going up. Everyone is feeling the crunch these days with inflation. Most like myself can't afford another rate hike. It's up to AEP to make better financial decision's verses placing this hardship on its customers. Most live paycheck to paycheck and this would be like adding an extra bill that I simply can't afford to pay. People are struggling times are tough. Yet another increase won't help anyone. Please don't allow an increase we have folks on a fixed income(including my parents) who just simply can't pay anymore. We have those that are having to pick up extra jobs (myself and and spouse). Please consider how this will effect people and vote no! Things have to change if we keep allowing them to raise rates they will continue to. If they can pay their CEO 16 million I think they need to reevaluate. My electric bill is above and beyond reasonable ready. Thank you for your time.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Dear Kentucky Public Service Commission,

Kentucky Power customers are already paying the highest power bills in the state. We need warm homes, affordable energy, clean air, and a safe climate - NOT HIGHER BILLS. Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Sincerely,
Mrs Melissa Cordle

Dear Kentucky Public Service Commission,

While I'm no longer a customer of Kentucky Power myself, I am deeply worried about the tragedy and hardship that higher electric bills will cause so many people in Eastern KY. I was a Kentucky Power customer my entire life, and most of my family still lives in Ashland in KPC territory. For people who don't pay much attention to their electric bill because they can pay it no matter what, an 18% increase may be pocket change. But for MANY Eastern Kentuckians, thousands of whom survived last winter because of community support in paying their electric bills, this bill increase will be unfathomable. Kentucky Power reported in it's annual HEA update this year that over 1,600 customers were on the waitlist for utility assistance from fall 2021-fall 2022. That number will continue to go up as customers face another harsh winter and now possibly even higher bills.

Kentucky Power has countless other options for cash infusion BESIDES asking their customers for more. Kentucky Power is solely owned by AEP, which is doing very well financially and has plenty of money available for its struggling utilities. Instead of looking to raise rates, Kentucky Power should be concerned with their inability to plan for winter storms (for example, Winter Storm Elliott) and the thousands of people in their territory who desperately need help both paying their bills and weatherizing their homes.

By approving a rate increase, the PSC will be approving KPCs bad behavior and poor financial planning. Kentucky Power has been allowed to gauge customers for decades, and it's time to put a stop to it.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Sincerely,
Ms Corey Dutton

Comments: I am writing in opposition to the 18.3% residential rate increase Kentucky Power Company has asked for. I am a disabled resident living on Social Security and my wife works part time at Walmart. We are a typical family in this area where the largest group is retired and disabled residents. The impoverished families in this area have suffered for years from Kentucky Power mismanaging their income and asking and getting rate increases almost on a yearly basis. The company got accustomed to a booming economy back in the coal boom and has asked and gotten raises as the coal companies and former workers moved out of the area to keep the same amount of revenue coming in. The company needs to restructure their payroll and bonuses to meet the current income that should be coming from this area. Please do not grant this increase while they continue to raise administration salaries and bonuses. The shareholders can also get accustomed to fewer dividends so the poor can be able to afford to heat their homes.

Comments: Kentucky Power has to be stopped. They are constantly raising the rates each year, sometimes multiple times per year. The electricity goes out each time the wind blows a little hard, or when it really cold. Something that never happened previously. My electric bill alone is already at least \$800 per month for my 3 bedroom trailer in the winter. That's more than any other bill I have, and it's a good chunk of my paycheck each month. Enough is enough with the greed, the people actually paying to make these people billionaires aren't going to survive it.

the failure of ky powers management should not fall into the laps of people barely getting by as it is..If you are going to look at an increase, look and see if they are competing on the cost of materials or just going with the regulars..

,if you 3 don't put a stop to unfair costs being put off on the consumer,,remember,there's someone you know who this will hurt,,

Dear Kentucky Public Service Commission,

Kentucky Power customers are already paying the highest power bills in the state. We need warm homes, affordable energy, clean air, and a safe climate - NOT HIGHER BILLS. Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Sincerely,
Samuel Hollifield
500 Gearheart Fork Rd Hazard, KY 41701-5360

Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency! EKY cannot afford a rate hike, and Kentucky Power should be doing more to help their thousands of customers already struggling with high bills. On social security and my 3.2% COL increase will not even cover the increase in food, we have turned down and cut back in almost every day life! There is no more to cut!!!

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Sincerely,
David Wheeler

Most people in Eastern Kentucky are hurting. Between energy bills, auto insurance costs, and inflation, people are struggling to buy food and pay the bills already. We can't afford another rate hike! We live in one of the poorest areas and have the highest energy rates. Please don't cause more burden on us than we already have!

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs.

Unfortunately for us, we remodeled a duplex and have two meters because it is not financially feasible to combine the two, therefore my bill is double. The first raise of \$30 was \$60 for us and the second was the same way. While others had a \$60 raise mine was \$120. And that really hurts on a fixed budget

I am 82 years old, am in a wheelchair and live alone. My electric bill is my biggest expense. I am already having to pay KY Power more because they blew up that coal fired plant at Louisa, KY. They said they need help paying for it. They shouldn't have blown it up. Kentucky Power and their CEO have deeper pockets than me! They should pay! Get a grip, folks!!!

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Kentucky Power SHOULD NOT be allowed to increase rates.
Their profits margins are high. Executives should receive less and the company should learn what a budget consists of (like its customers do monthly).
Thank you

Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs.

My family is already paying too much for electricity. It is our biggest monthly expense, even higher than our car payments. We have conserved, installed energy efficient appliances and LED bulbs, yet our bills always increase. We were without power for 16 days with the last ice storm and our bill didn't go down during that time frame. Any company that can't afford to operate, shouldn't be paying their CEOs millions. While I'm opposed to any increase, any given should come with stipulations that CEO, shareholder, and management pay should be cut to make up for most of it.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Dear Kentucky Public Service Commission,

Kentucky residents do not deserve to pay for the misappropriation of funds that Kentucky Power has allowed to happen to their company while trying to force their customers to pay for their own shortcomings & budget issues. Kentucky Power customers are already paying the highest power bills in the state. We need warm homes, affordable energy, clean air, and a safe climate - NOT HIGHER BILLS. Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Sincerely,
Mr. Chris Lynch
2703 Campbell St Ashland, KY 41102-4362

Dear Kentucky Public Service Commission,

Kentucky Power customers are already paying the highest power bills in the state. We need warm homes, affordable energy, clean air, and a safe climate - NOT HIGHER BILLS. AEP and Ky Power past actions and/or inactions have led to their financial problems. Knee jerk reactions to close effective coal fired plants rather than put in scrubbers and refusals to build or upgrade facilities should not force we the consumers to fund their failures. Parent company AEP can step in to help correct the problems without rate increases but why should they if they can pass everything on to the consumers. Fixed incomes and low incomes will be forced to chose between medicines, food, or heat to survive. DO NOT GRANT THIS INCREASE! 18% is ridiculous!

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Sincerely,
Daniel Gash

As a senior citizen on a fixed income, it is very difficult to survive due to the constant increase in everyday living.

Heat is a most essential commodity as being elderly, you get colder. Having to keep your heat low to try to pay the electric bill causes a risk to the elderly's health. An 18 per cent increase is too much

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Sincerely,
Ann Howell

Dear Kentucky Public Service Commission,

During the ice storm of 2021, our home lost power for 2.5 days. We were new to our home and tried to brave it due to our fireplace. We slept in shifts at night to keep wood burning. That fireplace had an electric blower, and without electricity, the heat did not carry through the room. We hung blankets over the stairwell and dining room entries, but our temp in that room (the warmest room in the house) got down in the 40s. We had two young kids, and we couldn't stay anymore. That was just two days. Inflation is high, groceries and gas are out of control. Eastern Kentucky is rural with school buses and people having to do a lot of driving.

We DO NOT NEED HIGHER BILLS. Please reject Kentucky Power's proposal to raise residential rates by over 18%, and encourage Kentucky Power to address already high customer rates with energy efficiency programs.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Sincerely,
Mrs. Debbie Criss
