Comments: Request for 4 million dollar rate increase seems excessive to not be detailed. If it is for salaries and other wages, or infrastructure, or other equipment then it should be detailed and I have no problem with this . All items today are much higher than they were a year ago so it is not out of line to ask for a rate increase, but what is this rate increase for? From looking at the proposal it would appear that the increase is based upon the meter at every user(Customer) . Why does this need a rate increase and the other areas do not? Thank you
