Dear Commissioners

Case #2024-00115 KY Power DSM Case

I am asking you to help the low income families and myself with the electricity, and allow us to be able to receive the education class program, the financial incentive, and give us more knowledge of the peak hours of saving on our bill. And the other programs that was offered back in the 1980-90's. Many residents do not know about the programs and I believe it need to be address and offer to us. Thank you for allowing me to have this opportunity to share my comments and thoughts for my concern neighbors and family members

Sincerely,
Karen Hudson

[REDACTED]

Dear Commissioners

Case #2024-00115 KY Power DSM Case

We don't want to spend \$300M of our money on a risky investment in a natural gas plant; its cheaper to invest in hard working Kentuckians and our communities through energy efficiency, smart appliances, and battery storage instead. Studies show that Virtual Power Plants (VPPs) are 40-60% cheaper than gas peaker plants, and deliver more benefits to ratepayers as well! We Kentuckians need and deserve that. In fact, utilities can earn a higher return on DSM investments than new generation. KPC has a chance to give their customers exactly what they need most, and make a profit doing it. Why would we do anything else?

Sincerely,
Hannah Walker

Dear Commissioners

Case #2024-00115 KY Power DSM Case

We need you all to invest in us instead of asking us to invest in you [toward the proposal]. Demand side management (DSM)/ energy efficiency (EE) are almost always the cheapest and most effective way to lower bills, protect homes, and address energy demand.

Sincerely,
Jaz'Myne Ware

[REDACTED]

Dear Commissioners

Case #2024-00115 KY Power DSM Case

DSM must be treated as a resource instead of an afterthought. DSM and energy efficiency is the most effective and cheapest resource that can minimize investments in new infrastructure.

We don't want to spend \$300M of our money on a risky 40-year investment in a natural gas plant; its cheaper to invest in hard working Kentuckians and our communities through energy efficiency, smart appliances, and battery storage instead

Studies show that Virtual Power Plants (VPPs) are 40-60% cheaper than gas peaker plants, and deliver more benefits to ratepayers as well!

We need and deserve that Utilities can earn a higher return on DSM investments than new generation. KPC has a chance to give their customers exactly what they need most, and make a profit doing it. We must demand that they do that.

Sincerely,
Stephen Dutschke

Dear Commissioners

Case #2024-00115 KY Power DSM Case

We need to work on updating what we have. Electric company's have not prepared for this they should have put money somewhere in hold for improving this service. As always they want us to foot the bill. Everybody getting money for the electric company's could have got less monet from them and saved money for outdated electric.

Sincerely,
Cynthia Mckenzie
