[REDACTED]

Dear Commissioners

Case #2024-00115 KY Power DSM Case

There is so much evidence that fossil fuels are contributing to climate change, so it is vital we begin making increased opportunities for alternative power sources. Every source will have some negative impacts, but we need to consider which ones are most impactful in decreasing our environmental footprint. With education and respect for land that will be used, we can begin to make progress. It is also important that we increase our rooftop solar. There are so many homes and buildings that are suitable for solar panels, and with financial support, I am sure many would be happy to have them.

Sincerely,
Mary Miller
