Comments: In reading the public comments from March 4th, it is apparent to me that most if not all of those comments are not from real people or they do not live in our community. None of the cities listed are in Breckinridge County even though the residents say they are county residents. I hope you will take into consideration the impact this solar farm will have on the agribusiness in Breckinridge County. In their own economic impact study created by Professor Coomes, (University of Louisville) he states this project will see a net loss of 7.61 Agribusiness jobs once its complete. 8 people stand to lose their jobs if these panels are placed on those 1100 acres. These lost jobs

will impact the small farmers who rely on those businesses in our community.

The New Frontiers Solar Park presents a great opportunity for Breckinridge County and I strongly support it. This project will bring much-needed funding to local public schools and will support essential services that benefit all residents. Beyond the economic boost, this project will help make the county more energy resilient and prepared for the future. Supporting clean energy projects like this helps drive local growth. Breckinridge County should take advantage of this chance to strengthen both its economy and its energy infrastructure.

I ask you to vote to approve this project.
