Reference Case #: 2024-00037

February 28, 2025

To Whom It May Concern:

I am 94 years of age and a lifelong resident of Barren County, Kentucky. I am saddened by the proposed development by Wood Duck Solar as it is destroying prime agriculture property and it almost surrounds my property and is around many, many houses in this area, destroying our community.

It would break my heart to see this development destroy our farms and interrupt the deer and all of the wildlife that we have here.

I have lived a long and healthy life and I do not want toxins spread into the environment from solar panels and hope to remain so. The runoff water which flows to Mammoth Cave should remain as clean as it is today.

I have children and grandchildren and I want to leave them with a safe and healthy environment

I knew nothing about this project until the last week or so. Please do not approve this project.

Truly,

Viola Williams
