Comments:

I am writing to express my concern regarding the failure of Governor Beshear to appoint an ad hoc public member to the Ky State Board on Electric Generation and Transmission Siting for the October 2 hearing on the Wood Duck Solar project in Barren County.

As required by law, a member of the public from the affected county is to be appointed to the Siting Board so that the interests and concerns of local citizens are adequately represented during deliberations. In this case, that appointment did not occur. The absence of this required public member meant that the citizens of Barren County were effectively denied their statutory right to representation.

This omission undermines public trust in the fairness and transparency of the siting process. I urge the Commission to address this oversight and give heightened consideration to public comments, as these voices have not been adequately represented.

Thank you for your attention to this matter.
