Comments:

I am directly affected by the proposed project of Wood Duck Solar and have never been contacted by one of their representatives and they most definitely have not knocked on my door. Even if they did while I wasn't at home, my security cameras would have alerted me, in which they didn't.

Not to mention, there was no one there to listen to the public comments, question the representations made by Wood Duck Solar, or to participate in the deliberations as the commission makes its final decision. This error cannot be corrected unless you set aside the hearing. Not only is it a failure to fulfill the statutory requirements, but it denies the public substantive and procedural due process.

I believe this is a detrimental oversight as once again, the public has not had a voice. I realize that KY law allows the commission to proceed with a vacancy, but in this highly controversial proposal with hundreds opposing the development, we ask the commission to weigh each signature, each letter and each email as if the weight of the law – as if submitted by attorneys – as if submitted by paid consultants.

I believe this project should be halted and that each individual who has expressed their concern of not wanting this project to go forward should have a voice that carries more weight than those who are profiting from it. Kentucky needs to do better and be better. And I especially expect more out of the county I reside in.
