**PUBLIC SERVICE
COMMISSION**

Case: Wood Duck 2024-00337

Dear Frankfort,

This is my second letter to the board. I just learned that the Governor did not appoint someone to the board to represent the community. This is awful.

We have tried so hard to finally be heard. Our local judge and the solar company have told us for years "it is a done deal and there was nothing we could do."

We are hopeful the commission will listen to us and deny this terrible project. It is harmful to the environment, property values, the rural landscape forever altered. The construction will disrupt wildlife and will be noisy, creating dust and erosion. We have beautiful trees that will be destroyed. Beautiful grasses and flowers.

Those of us who live here know the area and the underground water concerns. We're less than 10 miles from Mammoth Cave and with the proposed expansion of Mammoth Cave, we are even closer. How could you possibly put 28 industrial solar companies in the middle of rural and nature reserves?

Again, I ask that you deny this project. It is wrong for Barren County and wrong that we did not have a voice at the hearing. Please listen to our letters and comments.

Truly,

Lillian Wilson
