Re: Wood Duck Solar 2024-00337

Dear Siting Board Commission:

This is my second letter to you. I wanted to address the fact we did not have a community at-large member appointed to the Ad Hoc Committee.

I believe this to be an error and ask that the commission give the upmost consideration to every letter that has been sent and weigh it heavily against the "experts" who have testified for Wood Duck attempting to salvage this disastrous proposal for our community.

I know for a fact, regardless of the paid studies, that I will lose value in my land. I believe lease prices will increase. I believe toxins and shards will damage my soil, crops and potentially harm my cattle.

I support Mammoth Cave's position and ask that you take no actions that could potentially endanger the cave. Until the scientist have been provided a copy of the plans, the specifications on the types of panels, the specifications on the materials, etc. they cannot make an informed decision.

As I have asked before, I ask again to deny this project and keep Barren County Agricultural Green.

Respectfully,

J. David Pedigo
