Comments: Please stop the ruination of our land in Dunmor and Penrod KY. There are no laws or statutes to protect the wealth of the people. If this company, along with 7 or 8 other companies are able to build, their ventures will ensure the wealth of all their neighbors is stolen. Their inheritance devalued. There is an entire lost city called paradise that can be utilized. Tva is the only option to buy this electricity. The fella who owns this llc is employed by tva. Magistrates and others have been lying to the community. Intimidation is occurring. People are being followed. I own land in dunmor. It was a land grant to my great great grandfather post civil war. I have 3 aunts who own land in the area affected. The county has no setback rules other than those offered by the state. The owner of this company has a best friend who is a magistrate. The research

of our little group has made me recognize that tva is a monster. They have control over a lot. The way this so called business has grown is devious. I cannot understand how this company or the ones associated with it can do these things. One of the sister companies is in DENMARK. One is in Texas. One is in NY. How can we protect ourselves from these kinds of giants without your help? I'm tired of dealing with this. They have cause me much distress. I love my home county. I love my farm. I love my neighbors. I cannot vote in your state but I know a lot of folks who can. I wanted to move back and live there. But this has caused me to be fearful of the local government and those they can hold over a barrel. You know mc was known for coal and missing people and homicides. I haven't lived there in many years. But I would like to. And this is plain scary. And the wealth of the people will be taken for no reason. Except greed. And this owner can probably rent the land from tva the same way and do this over in paradise and on tva land. Places where no families or livestock will be affected. Plus you must consider the water. The batteries they will be using require special fire retardant. The surrounding lands which does include mine, will be in danger of total loss because water causes the fire to spread. Don't let this place be ruined. Don't let my family lose their wealth. That owner doesn't live out there. Idk of he ever did. He's moved. And he gets paid millions for giving up his peace and quiet. But then invited these companies to ruin it for those surrounding his land. This is theft. It is organized crime. It is against the people. And the good of the community. This community isn't built on get rich however you can. It is full of people with integrity and who love the land and their neighbors. . These people have put everything they are into this land. If this occurs, they will have successfully used the rules to steal from the people of these 2 towns. Thank you
