To whom it may concern,

According to a recent report issued on 05-09-25 by Lost City Renewables LLC, Case # 2024-00406, my home (noted as Residence 9) is listed as 8.21% for visibility of the proposed solar project planned for Penrod, Kentucky. This is the highest of any residences measured by Lost City. Since Lost City did not measure ALL residences joining the proposed project, I can't say visibility will be the worst at my house, however, I can say it will be very bad.

Please do not allow this project of 1,413 acres that would completely change the landscape of southeast Muhlenberg. As a homeowner, it is unfair to destroy the value of my property with such a drastic change in the adjacent surroundings for at least 30 years into the future.

Also unfair, is destroying the view along every road that visitors and residents drive. Lost City describes these views as "transient." But I promise, they will be lasting in memory to the visitors from across the United States who meet annually for the Hunt Reunion. They will not be forgotten nor unseen by all those tourists who visit Lake Malone State Park traveling Highway 949, 431, Forge Mill Road, or the Union Ridge Road. Depressing black views will be noticed by all those children who ride the busses twice daily to and from school. The panels will be seen by residents who pass daily for work, grocery shopping, doctor's visits and other daily needs.

When we hear the song, "My Old Kentucky Home," we think of our own home. But we realize that with more than 1400 acres supporting solar panels, these lyrics will no longer describe our homeland:

"the corn-top's ripe and the meadow's in the bloom
While the birds make music all the day."

This project will change the landscape of southeast Muhlenberg. It will change our lives. The view nor the effects on humans and wildlife will be "transient." They will be lasting.

Sincerely, *Colton Spaulder*
