Subject: Proposed cell tower construction

Ref Docket: 2024-00407

We write out of concern of which **type of cell tower** will be constructed as referenced above. The concern we have is the location is in a nice residential area and the type of towers constructed in our County over the last 20 years are basically eye sores.

We propose the type of cell tower be constructed for the location referenced at the intersection of Ky 286 and Hamburg Road in Ballard County Ky, currently used in Colorado, that resembles a pine tree. (photo is attached). This type of tower will fit in nicely with the amazing homes located in the area and with the tree lined roads.

This area is possibly going to have commercial solar projects constructed in the future, which has had tremendous local push back, mainly due to taking away from the beauty of the county. We have a duty to voice our property concerns, and resident's concerns, who reside in the area and we are presenting the concerns to the PSC.

If you have any questions or require further information, please feel free to contact me at ballardhex@brc.net or (270) 335-5177.

Thank you for your time and consideration.

Sincerely,

Todd Cooper, Ballard County Judge Executive

That pine tree is actually a cell tower
