TOWERCO 2013, LLC FOR ISSUANCE OF A)	
CERTIFICATE OF PUBLIC CONVENIENCE AND)	CASE NO.
NECESSITY TO CONSTRUCT A WIRELESS)	2024-00134
COMMUNICATIONS FACILITY IN THE)	
COMMONWEALTH OF KENTUCKY IN THE)	
COUNTY OF BRECKINRIDGE)	

ORDER

On June 4, 2024, Cellco Partnership dba Verizon Wireless (Verizon Wireless) and TowerCo 2013, LLC (TowerCo 2013) (jointly, Joint Applicants) filed an application seeking a Certificate of Public Convenience and Necessity (CPCN) to construct and operate a wireless telecommunications facility. The proposed facility consists of a tower not to exceed 199 feet in height, with attached antennas, and a shelter for radio equipment to be located on the east side of HWY 2779, south of KY 144, Stephensport, Breckinridge County, Kentucky. The coordinates for the proposed facility are North Latitude 37° 54' 13.31' by West Longitude 86° 31' 40.29".

Pursuant to 807 KAR 5:063, Joint Applicants filed statements providing the required notifications regarding the proposed construction.¹ Pursuant to 807 KAR 5:063, Joint Applicants have filed evidence that the county judge/executive² and all property

¹ Application at 6-7.

² Application at 6.

owners within 500 feet and contiguous to the cell site have been notified of the proposed construction.³ The notices solicited any comments and informed the recipients of their right to request intervention. As of the date of this Order, no public comments or requests for intervention have been received.

Joint Applicants provided copies of applications filed with the Federal Aviation Administration (FAA) and the Kentucky Airport Zoning Commission (KAZC) seeking approval for the construction and operation of the proposed facility. The Federal Aviation Administration made a determination of no hazard, and a copy of the notice was filed with the application.⁴ The KAZC application is still pending.⁵

Joint Applicants provided information regarding the structure of the tower, safety measures, and antenna design criteria for the proposed facility.⁶ Based upon the application, the design of the tower and foundation conforms to applicable nationally recognized building standards, and a licensed professional engineer has certified the plans.

Joint Applicants provided information, including a radio frequency analysis, supporting their contention that the proposed facility is necessary to provide adequate service and improve service coverage.⁷ Joint Applicants also provided information that there is no reasonable opportunity to co-locate its equipment on existing structures.⁸

⁷ Application, Exhibit Q.

⁸ Application, Exhibit R.

To obtain a CPCN, Joint Applicants must demonstrate a need for such facilities and an absence of wasteful duplication.⁹

“Need” requires “a showing of a substantial inadequacy of existing service, involving a consumer market sufficiently large to make it economically feasible for the new system or facility to be constructed or operated.”¹⁰ “Wasteful duplication” is defined as “an excess of capacity over need” and “an excessive investment in relation to productivity or efficiency, and an unnecessary multiplicity of physical properties.”¹¹ The wireless market is competitive and, other than the placement of towers and interconnection with other telecommunications providers, the Commission has little jurisdiction over wireless providers, including no jurisdiction over the rates and earnings of a wireless provider.¹²

Having considered the evidence of record and being otherwise sufficiently advised, the Commission finds that Joint Applicants have demonstrated that there is a need for the proposed facility arising from increasing demand for telecommunications services, to assure adequate coverage in the area, and to improve service in Breckinridge County by providing interconnection between Joint Applicants’ other sites forming a more cohesive network.

The Commission also finds that the proposed facility will not result in wasteful duplication. Building a new tower to improve telecommunication services and assure

¹² See KRS 278.54611.

adequate coverage when there are no reasonable opportunities to co-locate the equipment required to do so is not wasteful duplication. The Commission, therefore, finds that a CPCN to construct the proposed facility should be granted.

Pursuant to KRS 278.280, the Commission is required to determine proper practices to be observed when it finds, upon complaint or on its own motion, that the facilities of any utility subject to its jurisdiction are unreasonable, unsafe, improper, or insufficient. To assist the Commission in its efforts to comply with this mandate, Joint Applicants should notify the Commission if the antenna tower is not used to provide service in the manner set out in the application and this Order. Upon receipt of such notice, the Commission may, on its own motion, institute proceedings to consider the proper practices, including removal of the unused antenna tower, which shall be observed by Joint Applicants.

IT IS THEREFORE ORDERED that:

1. Joint Applicants are granted a CPCN to construct a wireless telecommunications facility. The proposed facility consists of a tower not to exceed 199 feet in height, with attached antennas, and shelter for radio equipment to be located east side of HWY 2779, south of KY 144, Stephensport, Breckinridge County, Kentucky. The coordinates for the proposed facility are North Latitude 37° 54' 13.31" by West Longitude 86° 31' 40.29".

2. Joint Applicants shall immediately notify the Commission in writing if, after the antenna tower is built and utility service is commenced, the tower is not used for three months in the manner authorized by this Order.

3. Joint Applicants shall file a copy of the final decision regarding the pending KAZC application for the proposed construction within ten days of receiving a decision.

4. Documents filed, if any, in the future pursuant to ordering paragraphs 2 and 3 herein shall reference this case number and shall be retained in the post-case correspondence file.

5. This case is closed and removed from the Commission's docket.
