Re: Proposed Wireless Tower at Falls of Rough Kentucky Area
Docket Number: 2024-00059

To Whom It May Concern:

I am writing in support of the construction and installation of a new wireless communications tower near Falls of Rough, Kentucky. I have been a resident of Falls of Rough for over fifteen years. Cellular service has been problematic since my arrival in the area. As a resident, I am in favor of any move that can be made that would enhance the service in the area.

I also am associated with the State Park at Falls of Rough. Although I cannot and would not use my position to advocate, I can give anecdotal evidence of the need for better cellular service. A reoccurring complaint that I hear from many visitors to the park is the cellular service in the area.

The only notation that I would suggest is confirmation that the tower would not interfere with the flight paths into and out of the Airfield located on Rough River Dam State Resort Park. The FAA designation for the field is 2I3 (2INDIA3) at Rough River Dam State Resort Park.

Thank you for your consideration.

Respectfully,

Michael D. Ricks
