Home phone: [REDACTED]

Utility Name: Jackson Purchase Energy Co-op

State the nature of your concern: I was informed of the case number that JPEC has filed regarding there Application for a Declaratory order 2024-00112. I wholeheartedly disagree with this request and would like to file a formal complaint on this matter regarding our Solar Lease and backup battery system. The email below from Travis Spiceland siting the 1978 Title 807 Chapter 005 Regulation 054 of the Kentucky Administrative Regulations (KAR) I believed has been superseded by the current PSC Net Metering requirements updated and approved in Feb 2014 and the May 14, 2021 PSC Press release. I am needing assistance in answering WHY JPEC will not allow an interconnection agreement to be established for a leased solar system with the option to fully own. I have read all the attached material and still

have no clarification. I feel I should be at least to establish an agreement under the Net Metering Tier 2 Tariff to establish a connection for a system that is under 30KW. Any production in excess power would be sent back to JPEC at the wholesale rate. And I was called directly by JPEC and spoke with Conner and he tried to talk us out of a Solar system. This is the System Proposal below we are wanting installed. I have attached the permitted approved plans and the design and installation details. PLEASE NOTE THAT ALL EXHIBITS REFERED TO IN THIS COMPLAINT ARE IN THE POSESSION OF ANGIE WALLINGFORD. REA Solar- Green Lease System Specs:(Roof Mount) System size: 16.38Kw (42)count Canadian Solar 390W black series panels(42)count SolarEdge inverters 30KW SolarEdge whole-Home-Backup Annual production(5.5 hour sun days)-24,549kwh 3-Tier Warranty(Product, Performance, Workmanship.) Lease product- Green Lease 30 year 4.25% Monthly payment-\$295.56 Year 5 buyout price-\$41,114.73(we can finance that for you, or you can keep leasing, up to you) If you decide to keep leasing after 60 months instead of making ownership your payment will increase by 4.25%/y You can buy out the system any time after 5 years as long as it is before the end of the lease(30Y) AND OWN This quote includes equipment, installation and maintenance for the 25-year warranty. We offer 100% Turn-key service. I've also attached spec sheets on the panels and inverters. Also included is our largest residential backup battery system, the 30Kw SolarEdge Whole-Home-Backup System. Please see the attached for tariff docs that Jackson Purchase currently has in force. I have pulled out 2 sections that I hope will resolve this interconnection issue. I also have attached the PUBLIC UTILITY REGULATORY POLICIES ACT OF 1978 and the Federal Power Act. I have read both and highlighted sections that may assist, but I will differ to your expertise. Additional information <https://www.kyses.org/page-1663546> <https://www.kyses.org/Advocacy> <https://www.tva.com/energy/valley-renewable-energy/green-connect> Please let mew know if there are any additional question and I sincerely hope to hear from you as soon as possible. We do not want to miss this opportunity to participate in a green energy future now.

Have you contacted the utility about the problem: Yes
