Linda Bridwell,

My name is George Casteel, I own the property at 5826 Limaburg Road, Petersburg, KY, 41005. I just received a notice from Duke Energy, case # 2024-00158. I am requesting intervention on this case. This is the third time I have had to file intervention on this project, the previous case number is 2023-00239. Each time I have requested the same information, which includes asking for details about the location of the electrical line poles and wires that they want to place on my property. This property is zoned commercial and I do have plans to develop this property in the future. I need to know if this project and placement of electrical poles and wires will prevent me from doing so. The aerial map that Duke sent certified mail dated May 14, 2024 with the notification does not have enough detail. I would like to know, again, exactly where the electrical wires, poles and guide wires will be located on my property. The aerial map shows nothing of this detail. I have asked this three times with no response related to my question. The mediator for this case ruled that I did have the right for intervention on my property. It is truly frustrating that I have been a property owner in Boone County for over 30 years and have paid my taxes in full and on time and I cannot get an answer. My time is valuable, as is yours. I am requesting assistance in getting answers on this public project. Duke Energy should be responsible to share specific details on this project when it affects personal property, not just for me, but for all of Boone County.

Thank you and have a blessed day.

George Casteel
