Formal Complaint

The Chambers vs. Kentucky American Water

Page 2 of 2

Wherefore, complainant asks for a reduction of
(Specifically state the relief desired.)

this water bill to reflect our
"normal" usage as there is
no answer as to why the bill
(usage) is EXTREMELY elevated except
for a dysfunctional meter.

To Doug Chambers [REDACTED]

We wanted to write to establish a timeline for the last couple of months at our personal residence 645 Lakeshore Drive. (The Water Company will have a detailed account of what they did). We have as we have spoken to Josh in the advocacy department several times and Oscar in the same department with no resolution. We had a leak in our downstairs toilet in June as water was leaking into our basement. Our plumber came on June 4 and he fixed the leak. We then replaced 2 toilets, one where the leak had happened and one upstairs. I called the water company to see if they had any type of forgiveness program in June and they informed me they do not have any forgiveness program for inside leaks. -In July we got a water bill of over \$700 which is 10 times what our monthly bill is. I called Kentucky American and they couldn't come check the meter until 8/21 and so I had my plumber come and take a look at everything to make sure all was installed properly and not leaking. Upon his inspection, and in his professional opinion nothing was leaking or running and all of our inside plumbing was good. There could not have been a leak inside of this magnitude (7,000 gallons in one day) without us being aware of it. -The water company will have a detailed record of this but they changed out our meter sometime in June, not at our request but they say they do this periodically?? -Kentucky American came out and checked our meter and ran reports of water usage which were VERY inconsistent and Jerry with KAW was stumped as to why this usage was so sporadic and high at times and then low. - They took the meter they had just replaced in June back to their shop and ran diagnostics on it and said it was working fine-again-they will have records of all of this. -They put on a new meter and Jerry came back out on Sept 4 to look at the meter and I had just started the dishwasher and washing machine and the meter was not moving. We then turned on the outside hose and it moved. This also stumped Jerry (who said he has done this for over 20 years). -On Sept. 5 Dauenhaur plumbing came out and found no leaks on the interior of our property. -On Sept 11 American Leak Detector came and ran a leak test on the exterior of our home and found no leaks and looked at all of our interior toilets and found no leaks. The plumber ran tests on 2 of our 4 toilets and they were not leaking at the time. He asked me to wait 30 minutes and turn on the water of the other 2 toilets and see if there was water in the tanks. I did this and there was water which means no leak. So to recap. Our water bill is 10 times what it normally is. We had 3 plumbers conclude that nothing is leaking inside and ALD conclude no leaks are happening on the exterior of the home. There are only 2 people that live at our home and our typical usage is about 160 gallons a day. If you look at the reports from the water company you will see the HUGE variance of this usage in July and August-and we have not done anything different. It seems that this is a problem with the meter as we have 3 professionals saying it is not anything in our home causing this exorbitant amount of water usage-not to mention, the water company employee expressing that this is VERY unusual and inconsistent water usage. I have all of the documentation from 2 plumbers and American Leak Detection I would like to send you. We are asking for forgiveness from these large bills from the Water company as we cannot find any fault of ours to explain this amount of water usage. Thank you for your consideration in this matter.
