COMMISSION

To whom it may concern:

I am extremely upset about the proposal to raise electric rates once again. As a widow of a disabled veteran, and as a retired school employee, we gave our lives for improving and protecting the lives around us. There is no way I can conserve enough to make up the difference in price this increase will raise my L G & E bill. I already stay cold in the winter, and hot in the summer to keep my bill as affordable as possible, and now you are raising it anyway?! Of course, I don't have the opportunity to "shop around" for lower cost electricity, as your company has a monopoly in my area. Please, please do not do this, my budget only goes so far. Please leave rates as they are. Do Not qualify for government assistance — make a few dollars too much per month.
