Subject: Keep/Improve Net Metering (LG&E: 2025-00114)

Re the efforts by Kentucky utilities to end/cripple net metering: it is imperative that the PSC not allow this, and actually take efforts to both increase net metering rates to match actual benefits provided, as well as ensuring that that status and the ability of new consumers to enroll continues for at *least* five years. I reside in Louisville (at [REDACTED], 40242), and have for multiple years in a row now *not* installed solar, as every time I have considered doing it, the specter of LG&E ending/slashing net metering payments has made it economically unfeasible to do so. Many others that I know here are in the same boat; the PSC *needs* to ensure that net metering has a definite future longer than the ROI period for these installs, so that already-strapped consumers are not being asked to take on the risk of installing the systems with no guarantee of fair compensation while LG&E captures all the benefits.
