Comments:

I strongly oppose Senate Bill 57 nuclear power is not the right investment for our energy source or our planet. It would take a long time to build and is unclear on exactly who covers the construction cost - it should not be the customer who did not choose the change to nuclear power. It is also not the right direction for our community as there is no permanent disposal site for the radioactive wastes from nuclear power plants. Please do not choose a new option for our energy that will cause more challenges for future generations.

Comments:

As a resident of Louisville KY and a citizen of the USA I wish to submit my comments to the KY Public Service Commission for case number 2025-00186 regarding the investigation of nuclear energy generation, storage and other related matters. As a representative for my extended family I wish lodge my deepest objection to the prospect of LGEs use, storage or generation of nuclear sources. This is not the time or place for such activity. LGE is not the agency to promote this action as they are too focused on profit to be considered trustworthy. This is no light-hearted matter and I trust that in the interest if the public you will take my concerns seriously. Thank you

Comments:

I would like to submit a comment against Case 2025-00186. Nuclear energy is an expensive fuel option that will further raise utility customers rates. The for-profit utility companies want nuclear because it has a large profit margin for them. I am tired of making LGE and KU stockholders richer and my bank account poorer. Please vote no on this case. Thank you.
