State: KY
Zip: 41701

Comments:

Eastern ky is the poorest area around and the highest power bills
I own a tree business and I know how hard working in the mountains and the cost but
I have been gone over half the month and I use propane , my bill has went from \$80 a month
to \$180 and i really have been home 11 days last month
Just a suggestion aep pays the big tree experts so much a day for when he's on there trucks
so guess what every truck has a winch
Also the same for there chippers and they are only used half the time but billed everyday
If thoes two problems was fixed y'all wouldn't be robbing us to make yer yearly quota
Us ol hillbillies aren't real smart but not dumb either
If it keeps going up I know it won't hurt you guys but I can live and work just fine without a tv /
internet ect
I will be buying more solar panels
If I used that much power I'd gladly pay for it but I know iv not
In the summer I run a windo unit 24/7 and my bill is rarely \$100
I'd at least like a kiss b4 they lay it to me

Comments:

To whom it may concern:

Please dont raise the electric bill rates for the people of Eastern Kentucky, it has already been hit hard several times in the past few years. There has been severe flooding multiple times, job loss, economic difficulties and various other factors that have greatly impacted this area. To raise rates on people with limited resources and income, is a shame and a disgrace. My family in Central Kentucky pays much less than we do in Eastern Kentucky for utilities. The number of people leaving this area continues to grow, due to job loss, cost of living and these things will keep causing people leave or if they cannot afford to move, they will suffer from the greed of a power company that continues to keep raising prices for the most vulnerable people, who can least afford it.

Comments:

I have live here 49 years and never seen my light bill over \$200 in a camper! A small camper at that. But it has doubled. Yes doubled! So I can only imagine what some in full size homes are paying.

With that being said, this is also why no one wants to live here or bring their business here. I do own a four bedroom two bath home in a different state that my wife and two kids stay at year round and the light bill there is less then here. So what does this say for Hazard? Its showing people that Hazard is worse then [REDACTED].

Comments:

These electric bills are ridiculously high and people were already struggling to pay the bill before these other taxes tariffs and whatever else were added on. People are struggling to feed their families and now struggling to keep their electric in to keep warm in winter. Please help the families in Ky from freezing to death and keep their electric on. There's no sense in raising electricity bills this high and causing people to be without. A lot of families just can't afford this so please help this community. Thank you for your time.

Comments:

I don't agree with this. I struggle to pay my bill as is. No im not on a Disconnect and as long as I have had my account I have always paid my bill in full when I get paid. I work full time to cover the bills that I have ,and I still live paycheck to paycheck. I have children so when it comes to birthdays and holidays I have to really work some magic. And now you all want to raise the amount I have to pay. It's ridiculous. What do you expect people to do. You know we have to have it. But you just don't seem to care as long as you pockets have been filled.

Comments:

To Whom It May Concern,

I am writing to express the deep frustration and outrage that many of us feel regarding the recent \$100 increase in our power bills from Kentucky Power Company. It is unacceptable, especially for those of us who do not even rely on central heating or air conditioning. This is more than just a billing discrepancy; it represents a blatant disregard for the financial struggles facing so many in our community.

It is unfathomable that a utility company can impose arbitrary charges and increases without accountability or justification. In a state where many residents are already facing economic hardship, these practices only serve to exacerbate the problem. How can any company, especially one that provides a critical service, justify charging its customers whatever it pleases?

We have no alternative power options, making us prisoners to a system that seems intent on taking advantage of its most vulnerable customers. It is high time we stand together to demand transparency, fairness, and respect from Kentucky Power Company. We cannot continue to accept these excessive fees without question.

The voices of the people are growing louder, and we will not be silenced any longer. It is crucial that action is taken to address these unjust practices. We urge the company to reconsider its approach to billing and to recognize the impact it has on the lives of its customers.

Enough is enough. We demand accountability and change.

Sincerely,

A very frustrated customer.

Dear PSC,

I write you this letter today begging you not to grant the recent request from AEP (Kentucky Power) to raise residential power rates. The fine folks of Perry County cant afford to pay more on their power bills than what they are paying now. We Perry countians have some of the highest rates in the state and suffer dearly by the cost of these rates. While AEP is bringing in record profits the people of Appalachia are barley getting by and in alot of cases literally starving to keep our lights on! I have a house hold of 3 people and my powerbill has already seen nearly \$500 for one month. 10% of my yearly salary goes to paying powerbills and its not sustainable to keep raising these rates on us. Please find it in your heart to help us and not approve this recent request by AEP. I know several elderly folks on fixed incomes who have already had to choose between food or power for their home for the month of January. Dont help these corporations rake in record profits while we barley get by.

Comments:

I conserve energy the best I can because we are a one income home, my income which isn't much. I also have two children I am raising on MY INCOME. My electricity bill has not been under 400 in the past six months. It is too much for a single wide two bedroom trailer and pay for all other expenses including groceries. I can't move but if rates increase anymore then I'm going to have to move from this area. No wonder so many have moved out of the area and this place is known for being "poor". There are no jobs because other companies don't want to be in the area due to energy cost and I honestly don't blame them. I don't even want to be here because of the energy cost.

I want to say that as someone who receives disability, I cant afford to pay another rate hike from the power company. Every time I get a cost of living increase, my rent goes up, and my SNAP benefits decrease too, so I never really profit from the raise. Every year, Kentucky Power requests another increase, making it harder to get by. What happens when they ask for so many raises that I run out of money to give them? Remember the old saying about how company and politicians keep the poor people poor and how they financially go after the poor people first? Well thats whats happening now..Please have mercy on us and not allow the rate increase..thank you.

Received through Public Comments

Sunday, February 1, 2026

From: Caitlin Stacy
City: Yeaddiss
State: Kentucky
Zip: 41777

Comments:

I am a Kentucky Power customer and a parent raising my family in this service area. I am asking the Commission to deny this rate increase because it would cause real, measurable harm to households that are already at their limit.

In many parts of eastern Kentucky, incomes are among the lowest in the state, yet our electric bills are among the highest. Electricity is not optional here. It is required for heat in the winter, cooling in the summer, refrigeration for food and medicine, and basic daily living. Another increase is not an inconvenience—it is a threat to the health, safety, and financial stability of families like mine.

Under Kentucky law, utility rates must be fair, just, and reasonable to the customer—not simply sufficient for the utility. Shifting the financial consequences of prior corporate decisions, infrastructure costs, or operational issues onto ratepayers who had no role in those decisions does not meet that standard.

Before any rate increase is considered, Kentucky Power should be required to demonstrate clear cost control, efficiency, and accountability. Ratepayers should not be treated as a guaranteed backstop for financial shortfalls.

I respectfully ask the Commission to consider the actual economic conditions of the people who will be forced to pay these bills and to deny this request in the interest of protecting Kentucky families.

Comments:

It's absolutely criminal the way Kentucky Power is able to monopolize and price gouging poor, hardworking, blue collar families. In the winter months it's normal for single family homes to get an electricity bill for \$800-\$1,000. Families are having to decide if they will pay for their electricity or pay for their car, and in the dead of winter in eastern ky if your only heat source is electricity, you don't have a choice but to pay whatever rates they see fit and it's 30-40% higher then neighboring county that are just as isolated. Kentucky Power needs to be stopped!

AEP already charges way to much for electric and the people here can't afford what they r charging now some r having to choose between groceries medicine or electric and some are buying and heating with propane to try to keep electric bill down because if all the high increases already when r the people going to get a break there is not a lot jobs here to get or be offered to pay all these increases it's ridiculous the people r struggling and the AEP don't care people should have a voice and vote in all these increases taking place and people who have had electric disconnect notices are giving an option for a monthly payment plan but they still have yo pay the high monthly bill plus more on past due amounts if they can't afford to pay monthly bill how they going to pay monthly bill plus more on top of that someone should step up speak and defend the people take action stop these ridiculous high electric bills from AEP as long as no one steps up they will keep doing it because they can

State: KY
Zip: 41754

Comments:

The proposed Electricity rate that has been proposed in South Eastern Ky by Kentucky Power because they have the Monopoly in the area is absolutely ridiculous. The Poverty rate is 24.3% and is among the highest in the United States.

The current rate is already crippling our Economy. People are already spending less at grocery stores, pharmacies and doctors offices because they have to pay these insanely high Electrical rates. Currently the rate is \$15.33 per Kwh. The proposal of a 14.9% raise would make it \$17.61 per kWh.

After doing research there is just 14 other states that have that high of a rate or higher, but these states also have a higher wage given to their employees. Also according to the national poverty chart Kentucky is listed as number 6 in the United States with 136,096 families below the poverty rate.

Seniors and Parents of children are struggling every month, having to choose between groceries, medicine, going to the doctor, necessities, etc or paying the already insane electrical prices to keep their electric on.

Just a question, Have you ever had to look at your children and put back food or medicine that they wanted or needed because you were afraid that you wouldn't have money to keep your electric on to keep them warm? Have you ever seen your elderly parent/ or another elderly person have to skip on life saving medicine or go hungry because they were afraid to spend money because of their electric bill? It's inhumane, it's sad, it's crushing to be that person, I know this from a personal level.

So as you sit there thinking it's no big deal, us Kentuckians are scared to death, begging for you to stop this as our economy in Kentucky is already crippled, bleeding at the seams.

First of all it should be against the law to raise prices on something that's not been approved in the proper way, Second of all these companies around Perry is price gouging the people to the max already, Kentucky has proven to be one of the worst states to live in right because of stupidity like this, There is more restaurants, Hotels and gas stations than they are good paying jobs, The people can't afford a bigger power bill off of what they are making, The rich trying to get richer and pushing people to Leave Ky.

Comments:

The people of ky can not afford to keep paying seamless rate increases while the ceos and others at AEP get

Millions of dollars in bonuses . If this current increase is approved that will make a total of %65 rate increase over the last 6 years . No other buisness in this country has made increases anywhere close to this it's asinine to think that the poor people of this region can keep paying this . All because AEP holds a monopoly and the democratic leadership in place keeps allowing it to happen . When people have to make decisions on paying electric bills or food it's a problem. We use gas heat and our electric usage doesn't change during the winter months yet our bill goes from an avg 250-300 a month to 7- 8 or 900 a month in the winter with no explanation. Make it make sense

Comments:

The people in southeastern KY now face ultimate bills that exceed rent and house payments. one company has singlehanded placed our community in poverty and we are all slaves to the outrageous bills. Meanwhile, Kentucky power executives make ridiculous salaries and bonuses. No other business passes their overhead cost to costumers and AEP should not either. It's simple AEP has driven and will continue to drive people out of our communities because they cannot afford utility cost.

Please do not let AEP increase another 14%. We are already paying higher prices for electric in the USA. We are a poor region in north eastern Ky. We are an elderly couple on a fixed income. This winter is hitting us hard with owing total electric of 616.00 and propane gas of 200 a month. Let them look for other ways instead of passing it on to the consumers!

When is it going to be enough? What horrible things and situations are going to end up happening to honest people who already are being railroaded by KY POWER and my opinion PSC as they absolutely keep hurting a region already paying some of the states highest rates not to mention PSC APPOROVING THIS FOR PROFIT MAKING TONS OF IT THE PSC APPROVING TO HAVE US THE CUSTOMES PAY FOR KY PWEDS BUSINESS EXPENSES THATS INSANE 20-25 a month extra. Go ahead approve it for 7% same story diff day so the people who are being not a 15% hike approve it as u know that's how u do anyways. Want be long until people will start going hungry and having no power
MEANWHILE PREVIOUSLY IN 2025.....

AEP (Parent of KY Power) made record breaking profits for its executives and shareholders almost \$5,000,000,000

KY Power made a record profit \$500,000,000
THATS MANY MANY ZEROS

ALMOST EVERY 2 YEARS AND LOTS TIMES SOONER KY POWER REQUESTS
EVEN MORE MONEY AS IT IS A FOR PROFIT COMPANY AND SHOULD HAVE
TO PAY ITS OWN BUISNESS EXPENSES INSTEAD OF ITS CUSTOMERS
GETTING A 20-25 tacked on bill monthly extra charge that's absolutely insane you
passed it

WHY ARE WE HAVING TO PAY EACH MONTH FOR this company and its parent
company's business expenses when we already pay one of the highest rates in state
not counting the charges for their expenses. I can't believe that was passed as KY
POWER is for profit and makes profit therefore should be stuck with their own costs
as it's insane that and other extra charges is 15 percent in itself. When is enough for
this Greedy corporate shareholder pleasing company? Is it enough once elderly are
not able to buy their meds is it enough people are all ready having issues paying
almost 400 bills not mention the lottery every winter as you don't know and pray they
don't slap you with a 1000 bill as I've had it done to me and I don't come close to that
a month. I don't understand why the governing body continues to pass and approve
this nonsense and sure can't believe mere paying 25 extra month paying for their
expenses when there making an absolute killing.

The Parent Company AEP AND KY POWER just made RECORD PROFITS in 2025.
AEP who owns KY POWER MAKE CLOSE 4,000,000,000 in PROFITS and KY
POWER MADE \$500,000,000 by taking advantage of the Monopoly they have and
also the different agreements such as US CUSTOMERS ABSOLUTELY HAVING TO
HAVE POWER AND ITS SAD ALOT customers who a lot happen to be on fixed
income and are having to choose between electric and medicine, or Food. This
This is a yearly thing by this Company whose agenda is making even more money
while severely crippling an already crippled part of the state. I agree a company
should make money I do but there comes a time when how much is ever gonna be
enough?
