Dear PSC:

I have to voice my concern over the proposed expansion of the Bullock Pen water facility. As a property owner on the lake, I do have concerns. I have heard arguments from both sides. I live on the shallow end of the lake and if the water level is lowered by 2-3 feet what will we be left with on our end? Not much. I understand the need for more water as the area grows but at what cost. No matter the argument, if some common sense is applied, we know the wildlife around and, in the lake, will be negatively impacted and likely property values. It seems to be a non-decision to purchase water from other larger water services. This seems to be a better financial and environmental choice.

Thank You
Jimmy Trusty
