**RE: Case No. 2025-00259 – Investigation into the Potential Expansion or Replacement
of the Bullock Pen Water District Water Treatment Plant**

Dear Commissioners,

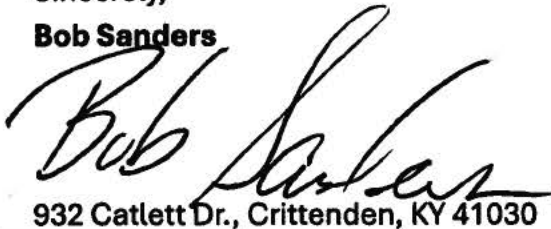

To whom it may concern,

My name is Robert Sanders. I am a 67-year-old divorced male. 11 years ago I started a new life, I chose to start that life here on Bullock Pen Lake. It may not be much, but it's my home. Don't get wrong, I love my home. It's everything I worked for during my 52 years of working. It's got everything I wanted, a house on a lake, with a boat dock. That is where I keep my new boat.

Now the water district was to take out more water, lowering the lake level. I live on the inlet side of the lake. I must drive my boat through the tunnel that connects our side with the main lake. It's already shallow. As little as a two-foot drop would cut us off from the lake and boat ramp. I am afraid of any drop of the lake with severe harm the side of the lake with its property values. It's increased mud and probably smell throughout most parts of the year.

Sincerely,

Bob Sanders

932 Catlett Dr., Crittenden, KY 41030
