To whom it may concern,

The proposed construction of the wireless communications facility located at 1429 JB Copeland Rd, Symsonia KY 42082 should be rejected. While we understand the developers goals, the landowners in the surrounding area has significant concerns in regards to this proposed project. Please reconsider the project based off of the following concerns.

Cell phone tower presence causes property value decrease anywhere from 2% to 15%. This will also cause the real estate value to decrease in this area. Not to mention, there is a cell phone tower that was just built at the location of 6154 Symsonia Hwy, Symsonia KY 42082. The distance between the cell phone tower on Symsonia Hwy to the proposed project is 1.5 miles. There is no logical reason to have two cell towers that close in distance.

Cell phone towers may also put off harmful radiofrequency levels that could cause

possible health issues such as; cancer, DNA damage, and even neurological symptoms over time. This is concerning for children and adults who would like to have a family in this area in the future.

To conclude, this proposed project causes many concerns from the landowners located in this area. These concerns pose risks to our community & quality of life. We do not support this & request that you re consider the location of this project due to these factors.

Thank you

James Nelson & Dana Nelson
