Comments:

I am a Grayson County resident. Up until the last year our water had come from the Edmonson County Water district. We had nothing but trouble while receiving water from there. It was either boil water advisories, low water pressure, or no water at times. Why should a Grayson County resident have to get their water from Edmonson county is the big question.

The Public service commission is denying Grayson Water full access to serving us water WHY???? If we are Grayson County residents our water should come from Grayson county not Edmonson County. Since receiving water from the Grayson County Water District. We havent had any issues. Why make us deal with a poorly ran water district when we have our own water district in our county to serve us.

Thank You for renewing our water contract for another year. Why cant the contract continue being renewed???

If I wanted Edmonson co water service I would be living in that county BUT I am not. Neither are the other residents that this will affect. I know they all want to keep getting water serviced from Grayson County Water TOO!!!!

Comments:

I would like to remain on Grayson County Water District. Edmonson county water district has unreliable service and poor quality, and a serious lack of transparency when dealing with customer complaints. I do not feel my water source from them is safe and unreliable. Due to the primary water source from the Green River is seriously compromised due to lock removal and their inability to provide enough water to service the amount of customers that they had. Several times we have either lost water completely or had boil water advisories. And they do not have a sterling reputation for warning customers in a timely manner. I believe that putting Grayson County residents back on Edmonson County Water District will put too much strain on the water supply yet again and compromise the public's health and safety.
