PUBLIC SERVICE
COMMISSION

Dear PSC:

I just received notice from Navitas KY NG LLC today (10/18/2023) they are asking for more raises on the natural gas in this area that we use. The Families in this area can not afford more raises, they are suffering now from the floods in February and also Tornadoes that touched down. A lot are still living in campers and with family trying to find the funds and means to build their homes back or repair them. The Power Co. just got a raise a few months ago and are already asking for another one. People strive to just keep their heads above water with food prices that are soaring. There is no way they can afford to pay more for their gas bill. In February of 2025 my gas bill for actual use was 86.00 after they add their purchase gas Adj, and EE charge on it was 134.89. If they don't have their own gas lines in this area they shouldn't be allowed to make folks who are already suffering to survive pay for their purchases for gas. What ever happened to just paying for what you use? There is something very wrong with these companies just getting raises any time they ask!!!!

Sincerely:

Mrs. Benjamin Patrick
