**To:** PSC Public Information Officer <[PSC.Info@ky.gov](mailto:PSC.Info@ky.gov)>  
**Subject:** Case No. 2025-00113

Hello,

Thank you for receiving consumer comments for the proposed Kentucky Utilities Company rate increases.

I have two points:

1) Consumers should not have to bear the increase in costs for the same services provided. With inflation and increases in other cost of living factors, consumers are repeatedly taking the hit for companies, even while these companies are making huge profits. Residential charges are facing the highest rate increase of 13.55%, which apparently will result in an annual increase in revenue for KU of \$99,997,335.

Why does KU need almost \$100 million in additional revenue? I would advise you to look into their **profits** from 2024.

2) For utilities and services that are based on where a person lives, utility companies have an unfair advantage over consumers when it comes to rate increases because

consumers have no choice who to purchase electricity from. And we have to have electricity. KU is our only option.

I strongly encourage you to consider the residential consumer in this decision and REJECT the proposed rate increase. We simply can't take any more rate increases for a basic need such as electricity.

Thank you again,

-Dixie

Comments: Stop this! Do Not let this pass! So many cost of living expenses have increased and not my income. I am on a fixed income due to a recent disability and it has lowered my income significantly. KU already forced us to replace our electric meter last year and we saw an immediate increase in our electric bill. Lower income and increase in everything needed to survive. I can't handle 13% overall increase to the most expensive utility bill we already pay. Our house is all electric, no natural gas lines for utilities as an option. How are we supposed to manage? Not like there is competition or options to switch to other providers. Maybe they should be asked to do better with managing their expenses? Also, I wonder how much the new meter project cost to

complete? Seems they may be passing this along as one of their increased costs but they only did it to increase their revenue. They've already increased our costs with the new meter trick and now they are doing it again in less than a year!

Comments: Please stop this. So many cost of living expenses have increased and not my income. KU already forced us to replace our electric meter when nothing wrong with the other "just a newer electronic version". This immediately caused a noticeable increase in our electric bill. If 13% overall increase is added on to our existing bill then I'm not sure we are going to be able to pay our bill. Everything is going up all at once. How are we supposed to manage? Not like there is competition and we have options for other electric providers. Our electric has already increased in the last year with the new meter they installed! My understanding is they forced these meters on all their customers. Seems they are already getting more revenue by forcing the new meters. Greed and

monopoly!

Home phone:

Comments: To the Kentucky Public Service Commission, I am writing to strongly object to Kentucky Utilities Company's outrageous request for an 11.5% increase in revenue, which means a 13% hike for residential customers. This is absolutely ridiculous — especially when the average Kentucky family is lucky to get a 2–3% raise each year, if that. It's even worse here in Kentucky, where we don't have any choice about where we get our electricity. KU already has us in a stranglehold — you can't even reach a real person on the phone without ridiculous wait times, and customers have no other option but to keep paying whatever they demand. Giving more money to a company that already has that kind of grip on us is crazy and unfair. Please remember: you are the one

line of defense the people of Kentucky have in this situation. We need you to stand up for us and reject this unreasonable increase. KU should tighten its own belt, not squeeze more money out of hard-working families who have no say in the matter. Thank you for taking this seriously. Jeremy Hawkins

**Sent:** Sunday, June 15, 2025 6:16 PM  
**To:** PSC Consumer Inquiry <[PSC.Consumer.Inquiry@ky.gov](#)>  
**Subject:** Solar net metering increase

Hello,

With the proposed increase to KU and LGE rates, the current net metering rates should be revised. Any electrical increase by KU and LGE should constitute a reciprocal increase to net metering rates. Those with solar supply electricity to the grid, and are part of the infrastructure so any who use net metering should also receive equal increase to the net metering rate. Solar net metering reduces the load of the infrastructure for the electrical companies, so if they get to increase their rates, solar

owners should also benefit from the increase.

If this is not the correct contact for net metering increases, please provide me the correct contact information.

Thank you for your consideration and cooperation,

Daniel

[REDACTED]

To whom it may concern,

Not that anyone on this commission truly cares about the people in Kentucky.

After Kentucky, utilities company has continued to screw its customers by adding every fee they can think of every tax they can think of and continuously squeezing every penny they can out of their poor victims. This crap is getting old.

No doubt the commission is getting some sort of benefit from this increase.  
As are our politicians who are failing us daily.

Each and every customer that is a Kentucky utilities customer is paying a fuel surcharge and u and until recently it's been a charge against the customer.

We're paying school taxes up on top of our property taxes, which are also School taxes why this is legal is beyond me.

As if our government isn't wasteful enough.

If Apple to Apple comparisons are attempted, we can see the Kentucky reportedly has some of the lowest rates per kilowatt hour versus the nation.

If you want a true comparison,

How much does the average Kentucky make on an annual basis and place that against the rest of the nation as this state is one of the poorest states?

And thus she may find a shocking surprise.

Yet again, every time we turn around, we're being forced to pay more for services for unjustified reasons.

If your office truly cared about the people in this state, you might actually do an in-depth investigative look into the funding that goes into the utility companies, not just electric

See the nice large salaries at some of the higher administrations are making and how much they're paying individuals.

And see where they're wasting money.

As of right now, I would request that you all deny their case in jacking the prices up yet again, as we are recovering from the last four years of a very bad economy due to

poor management of our nation.

I truly feel this email will fall up on deaf ears.

And no amount of speech, proof or anything else for that matter will allow you to vote now and deny this case.

But if nothing else, eventually people will be adjusted from their jobs if they don't eventually do the right thing.

Sincerely, one of the many voiceless victims of the ever increasing utilities scam and political bureaucracy.

Ron Martin

[REDACTED]

[REDACTED]

---

Hello,

I am writing in opposition to the rate adjustments proposed by Kentucky Utilities.

Residential service rates are scheduled to increase by over 13% effective July 1. The scheduled residential increases are higher than increases to any other Electric Rate Class. I believe residential consumers are being asked to underwrite the cost of commercial enterprises, and I don't think that's fair! Although I haven't digested the complete application, the reasons for the increases seem to be based on the needs of commercial users.

Please do not allow the residential rates to increase beyond the increases asked of commercial customers. Residential consumers can't take tax deductions for their power use, but commercial enterprises deduct their energy costs which makes the analysis even more weighted to the benefit of commercial enterprises.

Sincerely,

William J Wilson, III  
KU Customer  
Somerset, KY
