To: PSC Public Information Officer <PSC.Info@ky.gov>
Subject: LG&E's rate adjustment (case no. 2025-00114)

My name is William Fithian and I live at [REDACTED], Prospect, KY 40059 (cell is [REDACTED]) and my email address is [REDACTED]. My LG&E account

number is [REDACTED].

I have several questions about this proposed rate and charges increase which are to become effective on or after July 1, 2025.

1. I'd like to inquire into the **new projects** that are slated to be paid for via this annual increase of slightly south of \$163 million and will this increase remain in effect for the future? If so, for how long?

2. I estimate my total LG&E annual bill will increase by over \$250 which seems like a minor amount, especially without knowing what projects are involved and how long the rate adjustment increase will remain in effect.

My home is fairly small at 2400 sq. ft. and is very well insulated. We averaged only 760 kWh and 5.6 Mcf per month for the past 12 months and our average monthly bill was only \$172.03.

My wife and I are both 81 and on a fixed income so this increase amount is significant.

Thank you for a rapid and concise reply.

Subject: LGE&KU Rate Hike Proposal

As a current customer of LGE&KU, I do not agree with these rate hikes and proposals and would appreciate publicized documentation as to why they should be justified and how it would benefit the public and its customers. As a customer these rate hikes do not seem justified based off of the publication https://psc.ky.gov/pscecf/2025-00113/rick.lovekamp%40lge-ku.com/05302025093159/06-KU_Customer_Notice_of_Rate_Adjustment.pdf

We as customers of the company deserve better notification and better explanation as to exactly why these rates are taking place, how it benefits the customers, and how the extra monetization is being utilized.

Sincerely,

Lex Vanexass

Subject: Case No. 2025-00114 Comments

I am writing concerning Case No. 2025-00114 to address the reliability of service provided by Louisville Gas and Electric Company (LG&E).

If the proposed increases are allowed by the commission, then I request an increased factor for reliability which LG&E will be held to. Since moving to Kentucky over four years ago, my family and I have lost electrical power more than any other location we have lived in this nation. LG&E continues to inform us they are “working on reliability” but we still have random issues during and outside of severe weather events.

If I am going to pay this much more for service, it should most definitely be more reliable. When I've called LG&E I get told the same story that our power has only gone off a small percentage of time and mostly due to severe weather but that should be something they are working to improve.

Should the commission approve this increase, I request that a significant improvement in LG&E's reliability be mandated. This would necessitate substantial investments of time and resources into the local grid to ensure consistent power supply for customers.

Thank you for your attention to this matter
Gordon

Dear sirs , LGE rate increase is excessive . Rates have already rose considerably recently . especially natural gas rates .It has already become unaffordable to most lge customers to pay to heat their homes , me as well . Not being able to cool a home is dangerous to many of us as is freezing to death in winter . I ask that you look at lge profits to see if they deserve a increase . I am for free market capitalism but utility is different as they are the only choice and affect us all . They have installed their smart meters so the can cut if off from a distance quickly . I see us heading towards what Europe has , utilities that people can't pay with smart meters they can but a day or two of service at a time. The green movement has caused the unneccisary high prices in carbon fuel as well . make it to high that we can't pay.It works out very well for lge . thank you for considering my views . Please look at lge profits before you increase a necessity for life. Regards, Don Singer . [REDACTED] . Crestwood ky. 40014.

Subject: LG&E rates request

It has been brought to my attention that LG&E is requesting increases on electric and gas.
Please deny the request as their rates are already very high. Any increase will only put an increased hardship on my family and everyone else in the area that they provide service.
LG&E needs to look internally as to their waste and should remove all of it before just automatically asking for more increases from everyone else.

Thank you,

James D. Lish

To: PSC Public Information Officer <PSC.Info@ky.gov>
Subject: LG&E rates request

Regarding LG&E's notice to seek approval for rate increases on gas and electric, please do not allow the increases. LG&E rates are already very high and perhaps they need to look internally to clear up ways they are wasting money.

This increase will put a great hardship on the members of the communities they serve.

Thank you for your attention to this matter.
