Comments:

I was just informed from a family member that her power bill was almost \$700 for a bill just this month, who lives in a well-insulated, low power, low-cost home. I had another family member state that her power bill was over \$400 in a small, well insulated, low-cost home. They only live 20 minutes from each other. While I understand how inflation works this is absolutely unacceptable and from my understanding, Kentucky Power is asking for another raise in their prices. My family is in a low-income area and will have to pick between putting food on the table for themselves and their kids or keeping their heat on during these extremely low temperatures. There are many places that are even at a lower income rate than what they are and I cannot imagine how they feel. I am asking that something to be done to prevent situations like these. It is heartbreaking to see the amount of money I feel is robbed from my family, friends, loved ones, and even strangers. Please heavily consider making some sort of change to the way that this company is ran. People cant keep living like this nor should they have to. It is putting strain on their health in way that you could not begin to imagine.
