Dear Kentucky PSC,

Why is the Governor and Mayor of Indiana not concerned about these new Data Centers being Pushed on Indiana Residence?

I am writing regarding the proposed Retail Electric Service Agreement (RESA) between Big Rivers' Electric Corporation and the proposed data center in Hawesville.

The PSC must ensure that Big Tech's power demands are not paid for by Kentucky ratepayers. Western Kentucky families already struggling to make ends meet shouldn't have to pay a penny more to subsidize some of the most profitable tech companies in the world.

We need answers from the PSC about this proposal, including:

- Likely Residential Ratepayer Impacts: What impacts would this agreement have on residential power consumers?
- Ratepayer Protections: What enforceable ratepayer protections are included in the agreement?
- Confidence in Safeguards: How confident is the Commission that ratepayer protections will be effective throughout the life of the service agreement?
- Contingency Planning: What provisions exist in the agreement to course correct if ratepayer impacts are higher than anticipated?

Please use your authority to ensure the public has all the details it needs to evaluate this proposal before any final decision is made on this significant power contract. Our environment and the wellbeing of Kentucky citizens must come before Big Tech's profits.

Sincerely,

Sincerely,

Wanda Lee

Dear Kentucky PSC,

These facilities are highly toxic to humans and animals. The noise, contaminated water and air make it impossible for humans to sale their properties so they can escape the toxic environment created by these facilities.
