Comments:

We SERIOUSLY need outside help in Kentucky, our people cannot continue to pay these rates, taxes, adjustments, fees at this level. A Company that was built by hard ass working coal miners is now starving those same people and their families by rates and the constant approved increases. We don't care what your excuses are, we care how we are going to continue to support our families in an area that has nothing, no jobs, low population, under developed but still for some reason has the highest rates in the state.. not only do we pay the highest rates, the area I live in right now, loses power probably 20 times a year if not more, we lose power 2 hours after the storm, when the sun is shining, we lose power in the snow, in the rain, in the hot July sun.. we still lose power multiple times a month. I've had them out here multiple times, with them refusing to work on there side or the pole to fix a problem until we redid our entire side just to prove to them the problem was on there's. It can't be legal, there has to be a rule or regulation that controls the amount of profit they can make off us, since it is a public service that everyone needs and some people have to have to live.. families and seniors with bills over 1300 dollars for a month, when they live on fixed incomes that is constantly in threat of being cut by %'s every other day.
