Case No. 2026-00227

9/1/26

PUBLIC SERVICE
COMMISSION

Dear Public Service Commissioner,

I live at 69 Vaughn Drive, Lost Creek Kentucky, 41348. As a former flood "victim" my family is struggling to recover from a major disaster. My water bill has been fluctuating from month to month I have kept all my water bills and reviewed them to compare and reason out the difference. I have reached out to my local water district office and ask why the gallon usage has different prices at different times. For example if I use say 100 gallons the amount will be different from several months previously that the same gallons was used. The billing price isn't consistent. My bill is never under \$130.00 monthly. I can't afford this and I'm not going to be able to afford a increase. My husband and I both work with two children, and we need these matters looked into. We live in a small town, Breathitt County. and we need

some assistance with these matters. Please
look into the records of the water bills
for our county and people. We appreciate
our county water very much but we
are over charged.

Thankyou
Bridgette Lugato
